Alsa Corporate Structure.

In this fifth sustainability report, we report once again on the economic, social and environmental achievements of the entire Alsa group during 2021, including for the first time all our activities outside Spain, most notably Switzerland and Morocco.

2021 was a year of transformation and recovery for all of us, in which we continued to show what a great organisation we are, made up of the very best people and teams, who are the true architects of these achievements. Our corporate values of Excellence, Safety, Customers, People and Community, and Environment drive our actions, always guided by the needs of our stakeholders, and clearly expressing that Alsa is a socially responsible company.

The impact of the Covid-19 pandemic during 2021 was a highly significant factor, with a gradual recovery in activity that allowed us to bring all employees back on board over the course of the year.

With the clear aim of being the leading global public mobility operator, leading the modal shift towards public transport, we redesigned our corporate strategy at the end of the year, with a differentiated value proposition for our customers, making the commitments required to guarantee sound financial results and the long-term sustainability of the company.

Our commitment to the **Sustainable Development Goals** continues to evolve, and while by 2020 we had already established indicators to measure Alsa's real contribution, by 2021 we had taken the most important step: making firm commitments that will set the course for our company in terms of Equality, Safety and Environment

Particular emphasis should be placed on the "Zero Emissions Fleet" commitment aligning us with **SDG 11** "**Sustainable cities and communities**". According to which by 2035 all urban buses operated by Alsa in Spain will be Zero Emissions, extending this commitment to 2040 for long-distance coaches in Spain and for urban buses in Morocco.

In particular, we are proud to see our environmental strategy awarded the National Mobility Award in the large private company category, endorsing the whole contribution to environmental leadership we have put in place

As for our contribution to SDG 3 "Health and Well-being", this focuses on reducing the accident rate and pollutant emissions. Alsa is already committed to reducing accident rates on the new networks it operates by at least 10% during the first 5 years, and by 2040 we expect all our drivers in Spain to be monitored, with smart cameras across the entire the fleet.

Under this SDG, we would emphasize the improvements we have continued to make to our vehicle equipment, to combat the spread of Covid-19, making our buses a safe place for both workers and customers.

Likewise, with regard to **SDG 5** "**Gender Equality**" we continue to strive towards an increased presence of women in the sector. We have set an ambitious target for Alsa's workforce in Spain, to have more than 25% women by 2035.

The steps taken in this regard in Morocco are also particularly noteworthy. This has resulted in our being awarded the Diversity Hallmark, recognizing the efforts made by Alsa Morocco to bring women into the workplace, to benefit disadvantaged groups, and promote equality.

As I write these words we are experiencing a social disaster with the war in Ukraine. And again our company is doing its best by collaborating in the transport of refugees, having facilitated the transport of more than 1000 people from the borders of Romania and Poland, with the deployment of more than 100 volunteers, collaborating closely with NGOs in raising funds to help the Ukrainian people. If there is one thing I am clear about, Alsa is a company with values deeply ingrained within our organisation, one of the most important being its People.

Jorge Cosmen Chairman

Following the transparency exercise begun in 2017, with the publication of our Sustainability Report verified by AENOR in accordance with GRI standards, I am delighted this year to extend our commitment, publishing the Group's first report and therefore including all our activities abroad, showing our performance during 2021 in the field of Corporate Social Responsibility. Ours is a clear example of internationalisation. After more than 20 years operating in Morocco, our operations are now so substantial that in recent years we have become the country's leading public transport company.

This internationalisation strategy which began in 2000 has already paid off, and we now have almost 15,000 people in our group. We carried 423 million passengers during 2021, 55 million more passengers than in 2019.

In addition to Spain and Morocco, we have a presence in Switzerland, France and now in Portugal, where we are preparing the imminent launch of our operations for June 2022, with the start of Metropolitan Services in Lisbon, to be extended in 2023 to Porto.

Our growth is not confined to our international markets, however, and during 2021 we won such new contracts as urban services in Granada and Jaén, and metropolitan services in Cartagena in Spain. Growth that is only possible thanks to the excellent management which, for example, has allowed us to reduce the claims ratio by 61% since 2010 in Morocco, and to add and begin operating 700 new vehicles in urban services such as Casablanca.

We continue to make progress in our strategic digitalisation line, focusing primarily on improving the customer experience. In 2021 we launched the Mobi4U app, which combining in one single app all the mobility services available for journeys in an area or city, while also continuing with the digitalisation of sales and means of payment, with a single focus on customer satisfaction.

In environmental terms, 2021 was the year where we have taken on our rightful position of leadership, with firm commitments to decarbonization. While the previous year we announced that from 2030 we would not buy any more non-ZERO emission buses for our urban services in Spain, in 2021 we underpinned our commitment, by confirming that all city buses operated by Alsa in Spain will be Zero Emissions by 2035, extending this commitment to 2040 for intercity coaches and operations in Morocco

In 2021 our commitment to Hydrogen as an alternative fuel, which will be implemented in the long term in all our long and medium-range operations, was a decisive factor. We began 2021 by introducing the first Hydrogen bus, trialled in our services in Madrid, Oviedo, Zaragoza, La Coruña, Santander and Bilbao, where we were even visited by HRH King Felipe VI. This commitment has already in 2022 led us to permanently launch the first hydrogen bus from Spain, in the Torrejón de Ardoz Urban Service.

We also wanted to involve our passengers in offsetting the carbon footprint generated in their journey, and so from September 2021 offered the option of calculating the carbon footprint generated with the possibility of offsetting this through a voluntary contribution, dedicated entirely to the reforestation of the "Alsa Forest" in Palencia (Congosto de Valdavia). We are proud to say that in just four months, more than 9,300 customers have contributed to this inherent carbon footprint reduction.

In short, 2021 was a year of growth and great achievements a group like ours, with the people who make up this organization proving themselves the best possible stewards of our commitment to society.

Francisco Iglesias

Chief Executive Officer

## Leading mobility operator

Alsa is the sustainable, multimodal and connected mobility operator, the leader in the road passenger transport sector in Spain.

With over one hundred years of experience and a vocation for permanent innovation, Alsa is integrated within the National Express Group, an international bus, coach and railway public transport operator present in the United Kingdom, Continental Europe, North America, North Africa and the Middle East.

This comprehensive vision of transport enables Alsa to meet citizens' diverse mobility needs through a wide range of transport services in the regional, national, international, urban, charter (coach hire) and tourist spheres, while also specialising in the management of bus stations, service stations and vehicle maintenance areas.

**Customers** are at the heart of Alsa's business efforts, in accordance with the principle of **safety**. Alsa conducts its business with **professionalism**, **quality and innovation** on the basis of its commitment to society and respect for the environment.

In parallel with its development in Spain, Alsa has undergone an intense process of internationalisation leading to its presence in most countries of the European Union, boosted by the awarding of the Metropolitan Services in Lisbon and Porto, the start-up of substantial operations in Switzerland and the French border area, and in the Kingdom of Morocco, making it the country's leading urban operator, providing in each case the best possible solutions for citizen mobility.

Alsa undertakes
its operations
by viewing

Cross-border service in France.

Operations in Puerto Rico.

Bilbao and Ferrol Urban Service.

1st LNG coach in the world for long distances.

2020

Awarded services in Lisbon and Porto.

Launch of Spain's first self-driving bus.

2021

Spain's first hydrogen bus.

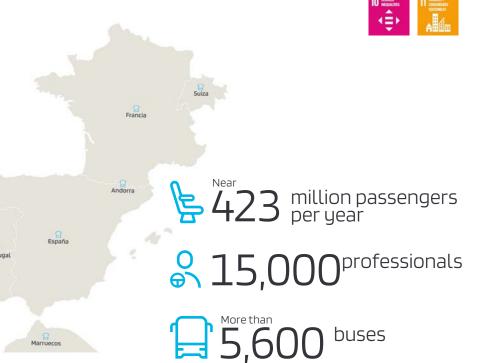

Commencement of urban service operations in Jaén and Granada.

Addition of 700 new buses in Casablanca (Morocco).

## Mobility operator

#### Alsa around the world

Alsa began an international expansion process in 2000, beyond its presence in Morocco which began in 2000, and in Switzerland in 2017. The company is currently operating in France and is expected to start operations in Lisbon (Portugal) in 2022.

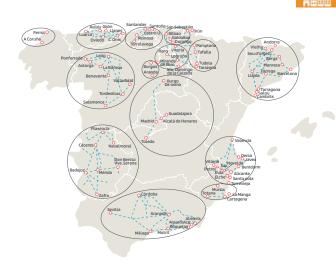

#### **Regional Transport**

Alsa works actively with the various regulatory bodies on the development of Regional Transport Consortiums in the Autonomous Regions..

Since 2020, Alsa's regional transport has had a presence in almost every Autonomous Region: Aragon, Asturias, Balearic Islands, Cantabria, Extremadura, Basque Country, Castile-Leon, La Rioja, Madrid, Catalonia, Navarre, Valencia, Murcia, Andalusia and Galicia.

#### Long-haul services

Leader in Spain for scheduled passenger services.

Alsa's national network links almost every one of Spain's autonomous region together, covering over 3,500 destinations.

Alsa's national network

Alsa links the Iberian Peninsula to most of the European Union and North Africa through an extensive network of European connections.

It also operates the cross-border lines between France (Pays de Gex) and the Swiss canton of Vaud.

A Corula Burdes Dipon Zerich Grossia Bolgerote Serich Grossia Bolgerote Serich Grossia Bolgerote Serich Grossia Bolgerote Series Grossia Bolgerote Grossia Bolgerote

Alsa links up more than 300 international destinations

#### **Urban and Metropolitan Transport**

Alsa manages 41 urban networks in different cities and metropolitan areas of Spain.

In 2021, Alsa added urban services in Granada and Jaén to its network. This represents a major deployment in Andalusia.

The company was also awarded the Cartagena metropolitan service.

The progressive implementation developed in Morocco means the company now operates in the main cities of the country (Marrakech, Khouribga, Agadir, Tangier, Rabat and Casablanca), becoming its leading public transport company.

In Switzerland, Alsa operates 2 lines for TPG (Public Transport of Geneva), and since 2020 the urban service in

Gex, France, the first such service that Alsa has run in the country.

The June 2022 scheduled launch of Metropolitan Services in Lisbon is a major milestone in its strategy of implementation and growth on international markets, to be followed in early 2023 by Metropolitan Services in Porto.

#### Metropolitan Transport in Lisbon and Porto

Metropolitan Services in Lisbon, which will start in June 2022, cover six municipalities with a population of more than 315,000 people.

Meanwhile, after the final contract award report for the Metropolitan Services in Porto, the plan is to start operations during 2023, which will lead the company to cover the connection between the city with 4 municipalities, adding over 300,000 inhabitants. For the new Portuguese services Alsa will be launching a fleet of more than 400 vehicles, directly employing more than 600 people and with an annual turnover of 44 million euros

#### Occasional and tourist transport

Alsa manages or participates in the management of tourist bus services of the cities of Madrid, Barcelona, Bilbao, Gijón, San Sebastian, Seville Murcia and Marrakech and the tourist train of Almeria. It also offers Spain's broadest, most comprehensive charter transport services and is the country's largest provider of transport for major events.

At the international level, the company operates a major tourism operation in Switzerland, connecting Geneva Airport to the main ski resorts in Switzerland, France and Italy. Through different forms of service, from private premium transfers and excursions to smaller group transfers to all tourist destinations, as well as all types of charter service.

#### Rail transport

Alsa's railway operations continue to grow. The tourist train operation, which began in 2017, has recently been expanded with the occasional freight train operation.

The Alsa Railway Training Centre, which has been providing specialist courses for railway companies and individuals since 2018, took over training services for the FGC (Catalan Government Rail) during 2021.

In addition, the company has been awarded the maintenance service contracts for facilities and buildings on the Lleida-French Border, Olmedo-Orense, Antequera-Granada sections of the high-speed lines handled by ADIF. Alongside the Madrid-Levante section added during 2021, and maintenance of the La Sagrera High-Speed building (Barcelona).

With regard to the management of switching services and other services connected with train operations, performed at the Zaragoza-Plaza freight transport terminal, the Valencia Logistics Terminal (Fuente de San Luis) has been a further addition since September 2021. This contract enabled Alsa to obtain authorisation to operate from the Valencia Port Authority, positioning the company as a fundamental link in the freight transport logistics chain.

## Alsa strategy evolves

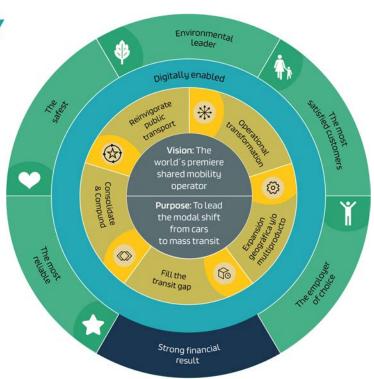

"To guarantee long-term sustainable results against a constantly changing backdrop, whilst meeting our goal of being a multi-modal operator of safe mobility services, fully invested in supporting communities and protecting the environment."

Alsa strategy is based on the following areas:

THE CVOIVE STRATEGY

By the end of 2021, the group has evolved its corporate strategy, redefining its Vision and Purpose to be the world's premier shared mobility operator, leading modal shift from cars to mass transit. To deliver our vision and purpose the company focuses on 5 distinct customer propositions, underpinned by a focused application of technology. By delivering this we will deliver profitable growth, strong financial results and sustainability of the company in the long term.

## Milestones in 2021

#### Profitable growth

#### New markets / modes / businesses

- Awarding at an exclusive basis of the point of sale at Geneva airport.
- Inauguration of new fleet in Casablanca with 700 buses.

#### Incorporation of quality businesses offering synergies with competitive sales

- Award of the service Alicante-Cartagena-Murcia.
- Acquisition of the company Rober, contractor for the Granada Urban Service.
- Launch of the new transport service at the Municipality of Jaén.
- Awarding of the Leon bicycle service.
- Awarding of the Switching Service and others at the Valencia Logistics Terminal.
- Authorization from the Valencia Port Authority to perform railway services.
- Award of training services by FGC.
- Award of maintenance of the La Sagrera High-Speed Building (Barcelona).

#### **Operational Excellence**

#### Organic growth

- Agreement signed at the FITUR trade fair between Castille-Leon and Alsa for tourist promotion.
- The Madrid Region is promoted on ALSA buses as a tourist destination in the UK and on the domestic market.
- The Xacobeo pilgrim route is promoted on ALSA buses for the domestic market.
- The University of Almeria and Alsa will be boosting the mobility of the future and strengthening the availability of university transport.
- 16% growth in digital sales.
- 2021 Women's Handball World Cup Transport Provider.
- AlsaCab expands its activity in Madrid.
- Overall recovery of passenger numbers in Morocco to Pre-Covid levels.

#### Cost efficiency

- Reduction in breakdowns.
- Artificial Intelligence in predictive vs. preventive maintenance.
- Adaptation of variable costs to changes in demand.

#### **Concession management**

- Award of the Alcantarilla to Murcia Concession.
- Award of lines in the metropolitan area of Cartagena.
- Burunzaldea contract extension.
- Award of Lots 1 and 2 of the IMSERSO services.
- New contract signed for Khourigba (Morocco).
- Contract Extension in Marrakech (Morocco).
- Extension of the Lagos Railway Contract.

#### Safety

- Videos to detect black spots at Madrid stations.
- Incorporation of the Biow air disinfection system on board buses, with 99.99% removal of particles and viruses.
- Collaboration between Bilbobus and Mapfre Foundation to raise awareness of blind spot risks around trucks and buses.
- Collaboration with Fundación Mapfre to support road safety at Juvenalia.
- 20.49% reduction in the At-Fault Accident Ratio in long distance, 5.64% in regional and short distance and 11.39% in Morocco, vs. 2019 data.
- Installation of rear cameras on 115 buses.
- Extension of the implementation of Drive Cam to the Canary Islands, Aragon, Ferrol and Jaén.
- 7,606 employee Covid Tests performed.
- 1,037 alcohol and 549 drug tests performed.
- Medical examinations performed on 82% of the workforce.
- 1,161 children taught at the Marrakech School of Road Safety.

#### **Excellence in Customer Service**

- Best Customer Journey Award from DEC Customer Experience Association in recognition of the adaptation of journeys over the past year in the context of the pandemic, through the Alsa Safe Mobility programme.
- Enhanced onboard entertainment with audiobooks and podcasts courtesy of Audible.
- Alsa customers will be able to ascertain the carbon footprint generated by their journeys and offset emissions.
- Best Company in BCX Customer Experience index in the 2021 Transportation sector.
- UNE 16880 customer experience certification.

#### Sustainability

- Alsa publishes its commitment to purchase only zero-emission buses for its urban fleets in Spain from 2030.
- Creation of the ALSA Forest in Congosto de Valdavia to reduce the Carbon Footprint.
- Almeria mayor introduces first city bus with zero emissions technology.
- Presentation of biomethane buses in Zaragoza.
- Presentation in Oviedo of 19 new ECO and Zero Emission city buses.
- Bilbobus, Repsol and Alsa carry out the first pilot test on 12 vehicles, with zero net emissions HVO bio fuel.
- Publication of the 4th Sustainability Report 2020, verified by AENOR according to GRI.
- 3rd Materiality Study, to steer the CSR policy.
- ALSA remains among the 100 Best Companies in Spain, placed 55 on the Merco ranking.
- Participation at SUM Bilbao'21 to present its experience with hydrogen.
- Signature of a collaboration agreement with the Spanish Paralympic Committee.
- Alsa is a member of the #CEOPorLaDiversidad Alliance, which brings together a total of 70 companies to address diversity, equity and inclusion.
- Alsa and the University of Oviedo send 815 books to Equatorial Guinea for university students.

- Relaunch of the Alsa and 'Plena Inclusión' campaign, to support people with intellectual or developmental disabilities with 15% and a free companion ticket.
- Alsa receives National Mobility Award for its environmental strategy from the platform Companies for Sustainable Mobility.
- Finalist of the 2021 ASCOM Awards for individuals, companies and institutions that
  most promote the professionalization, dissemination and strengthening of the role of
  Compliance in Spain.
- ALSA Integra Foundation Award for commitment to its Volunteering efforts.

#### **Talent**

#### Attraction / commitment / development

- The Teaching Committee of the Jovellanos Faculty of Commerce, Tourism and Social Sciences at the University of Oviedo awarded ALSA the Gold Medal for its support for the Master's Course in Logistics Management.
- Awards at the 19th EXPANSIÓN Awards for Innovation in Human Resources, for proving capable of personalizing/individualizing ongoing training by adapting it to the needs of each driver.
- Award from the Alliance for Dual Vocational Training given to Alsa and ASTIC for their project to establish a dual training track for Transport and Logistics in the Madrid Region.
- Alsa joins the Spanish Chamber of Commerce's Comprehensive Qualification and Employment Programme to promote youth employability.
- DIE Equality Seal awarded.
- Over 2288 surveys conducted for the 2nd version of the Employee Journey.
- Deployment of Talent Assessment in Spain.
- Localization of CHRIS into English, French and Portuguese.
- Post-Pandemic Reactivation of the Get Moving Programme.

#### Leadership

- AEDIPE ASTURIAS 2021 HR Professional Career Award for José Manuel Suarez Arguelles Director of ALSA Training Centres and Training Consultancy.
- New internal Communication Strategy.

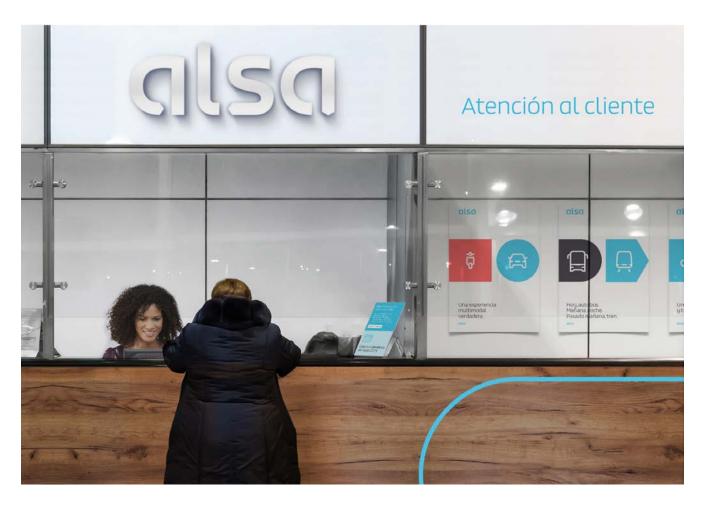

#### **Technology and Innovation**

#### Innovation

- Alsa and the Community of Madrid present the first hydrogen bus to operate an urban route in Spain.
- 5G technology tests to improve mobility in Europe on the Vigo-Oporto route.
- Alsa tests Vodafone's 5G in Malaga to improve onboard entertainment.

#### Technology

- Alsa advances digitalisation by introducing the electronic QR ticket in the central triangle of Asturias.
- Alsa launches Mobi4U, its Mobility as a Service app.
- Digitalisation strategy launched with 6 Keynote strands (MaaS, digitization of payments and sales, travel experience, non-scheduled services, asset optimization, internal management processes).
- New Alsacab app and new product scaling.
- Transport on Demand, Alsa Les Garrigues, in regional Catalonia.
- New Artificial Intelligence Area.
- Collaboration with the new startup Swiftly, to optimize operations.
- Launch of MaaS 4all, in partnership with EMT, Globalvia and Meep, for MaaS applications for third parties.
- Implementation in Switzerland of corporate applications with Icasework, CHRIS, AURA and ALPSTEAM.

the claim

AENOR UNE-CEN/TS 16880 certificate. Excellence in service. Creating exceptional customer experiences through excellence in service

This certification aims to design and implement improvements in service, to create exceptional customer/ user experiences and exceed the expectations generated.

Alsa has certified its services under standard UNE 16880 for urban and metropolitan transport in Bilbao, Ferrol, and East Coruña District

Alsa was the first transport operator to be certified by AENOR against COVID-19
Its position of leadership has a ripple effect in the Mobility

sector

## Corporate Social Responsibility

#### Corporate Social Responsibility Management Certificate

ALSA's CSR strategy is implemented through its corporate values, which guide the company's economic, social and environmental performance both in its operations and in its relations with stakeholders.

#### **Our Values**

Safetu

Through its Corporate Social Responsibility management system, the organization manages the development of its sustainability policy in accordance with the company's strategic pillars and in line with material or relevant aspects for its stakeholders.

During 2021, progress was made in aligning Morocco and Switzerland-France in the extension and progressive application of the group's CSR policies. By 2020, the group's sustainability policy had been revised and adapted for Morocco. The same is currently being done for Switzerland-France, with publication scheduled for 2022.

In Spain, action plans have been reviewed and a new Materiality study conducted to review the guidelines underpinning the company's Corporate Social Responsibility.

Progress has been made in Morocco on governance aspects such as the compliance model and the code of ethics, as well as on other social and environmental aspects, as will be seen throughout the Report.

In Switzerland-France, progress is being made in sustainability convergence, allowing alignment and unification of CSR policies already developed in Spain. In 2022, there are plans for a review process which could culminate in the certification of CSR management under the IQNET SR10 standard.

#### **Stakeholders**

Through its **Stakeholder Relations Model**, Alsa identifies its requirements, needs and expectations in order to minimize risks and detect new business opportunities.

People

Supervisory and administrative bodies

Customers

Investors and shareholders

Providers, suppliers and allies

#### 288

Opinion formers

Business sector

#### **Sustainability Policy**

The principles governing Alsa's sustainability policy can be summarized as follows:

#### "Our commitments" to stakeholders

#### Shareholders and Investors

- Ensure good governance and sustainability.
- Identify and respond to their requirements.
- Promote transparency.

**Management** 

- Ensure the involvement of all for good governance.
- Promote transparency.

#### Customers

- Place the customer at the heart of all activity.
- Only do what is safe.
- Offer innovative mobility services and solutions.
- Commitment to generating positive experiences.

#### People

- Talent development and Reward.
- Promote a sense of pride to be part of ALSA.
- Respect human rights and dignity.
- Promote training and talent development sustems.
- Attract and retain the best employees.

#### Administration and Regulators

- Ensure the flawless performance of contracts.
- Ensure access to mobility within the contractual framework.
- Promote transparency.
- Develop social responsibility.

#### **Suppliers and Partners**

- Open, fluid, honest and transparent dialogue.
- Build strong relationships.
- Promote teamwork.
- Alignment with sustainability policy.

#### Social and Natural **Environment**

- Ethics, accountability, dialogue and transparency
- Create sustainable value for society.
- Identify and fulfil community needs.
- Dialogue with social agents and trade union representatives.
- Reduce greenhouse gas (GHG) emissions.

#### **Opinion Formers**

 Promote transparency, active collaboration and provision of information.

#### **Business Sector**

- Free competition and active collaboration with other organisations and institutions.
- Strict compliance with competition law, exchange of best practices, integrity and ethics.

#### 3<sup>rd</sup> Materiality Study

During 2021, a new materiality study was conducted with the aim of identifying the social and environmental aspects that Alsa Stakeholders in Spain consider most relevant when developing corporate responsibility actions..

All stakeholders participated in this edition through questionnaires. New issues have been introduced regarding employee policy assessment, actions that include the company's environmental strategy,

as well as the organization's CSR performance or the importance of aligning the company's strategy with the contribution towards the SDGs.

As in previous editions, Alsa's performance and prioritization of sustainability operational strands and approaches were assessed.

A new Materiality Study was conducted during 2021

| Alsa values           | Strands of corporate responsibility | Good<br>governance,<br>ethics and<br>integrity | Environmental performance                | Environmental<br>strategy   |
|-----------------------|-------------------------------------|--|--|-----------------------------|
| Social<br>performance | Employees                           | Knowledge of<br>alsa csr                       | Perception of<br>alsa's perfor-<br>mance | Contribution to<br>the sdgs |

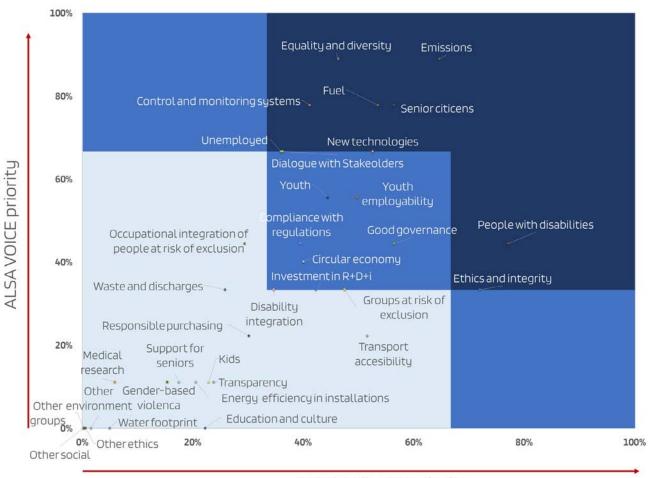

#### **Stakeholder Groups**

| Management<br>Committee | Employees                 | Corporate<br>clients  | Regulatory<br>Bodies suppliers | Providers, and<br>allies |  |
|-------------------------|---------------------------|-----------------------|--------------------------------|--------------------------|--|
| Business                | Opinion sector<br>formers | Social<br>environment | Investors and shareholders     | Customers                |  |

Based on the results of this study, a materiality matrix was created to plot the various different aspects depending on their degree of priority for the company's management and stakeholders.

#### ALSA/STAKEHOLDER MATERIALITY MATRIX

STAKEHOLDER priority

#### Intrinsic value

Safety as an unquestionable, inherent value.

#### **Priority aspects**

Control and monitoring systems; ethics and integrity; improving dialogue with stakeholders; reducing pollution/emissions; fuel efficiency and use of alternative fuels; inclusion and development of new cleaner and more efficient technologies; equality and diversity; actions targeting the unemployed, disabled and senior citizens.

#### 2021 CSR Lines of Action

In view of the actions undertaken during 2021 and the outcome of the materiality studies, the action plan has been reviewed, including new lines and continuing those already in place, which will serve to align stakeholder expectations with the policies to be implemented during 2022.

| Valor      | Priority aspects               | Lines of action  |
|------------|--------------------------------|--|
| Excellence | Policies and codes of          | Materiality studies.   |
|            | conduct                        | SR10 renewal.  |
|            | Improve dialogue with          | New corporate image.   |
|            | stakeholder groups             | Publication of Sustainability Reports.   |
|            |                                | Legal Compliance System.   |
| People     | Improve                        | Integrate young talent: Get Moving Programme and Graduate Programme.               |
|            | employability                  | Cooperation with Integra Foundation.   |
|            |                                | Cooperation with universities.   |
|            |                                | "What are you capable of?" programme.  |
|            |                                | English scholarships for employees' children.                                      |
|            | People with                    | "What are you capable of?" programme   |
|            | disabilities                   | Cooperation with Integra Foundation.   |
|            |                                | Agreement with ONCE Foundation to encourage jobs for people with disabilities.     |
|            |                                | Full Inclusion.  |
|            |                                | 2020 - 2022 Accessibility Plan.  |
| Community  | Reduction of                   | Emission reduction programme.  |
|            | emissions and fuel consumption | Fuel consumption reduction programme.  |
|            |                                | Efficient driving programme.   |
|            |                                | AENOR EA0050 Certification (Efficient Driving).                                    |
|            |                                | SGA ISO 14001 and SGE 50001 Certifications.  |
|            |                                | More energy efficient fleet renewal.   |
|            |                                | 100% electric autonomous vehicle.  |
|            |                                | Introduction of the First Hydrogen Vehicle.  |
|            |                                | Introduction of the ALSA Forest and programme to Offset Customer Carbon Footprint. |

## Code of Ethics and Criminal Compliance Management System at Alsa

Alsa has had a code of ethics in place since 2011, the most recent update of which, approved by the Compliance Committee, was performed in September 2021, and is available to all employees and stakeholders on the corporate website, to facilitate universal familiarity.

A review of the compliance-relevant procedures was carried out during 2021, as well as an update to the risk matrix and criminal compliance controls and assessment of the effectiveness and efficiency of controls.

Progress continues to be made in improving the Compliance Systems of the different countries where the company operates, with the ultimate aim of implementing a uniform system as robust as the one implemented in Spain and certified under UNE 19601.

The Alsa code of ethics applies to the entire group

#### Training, dissemination and awareness-raising in criminal compliance

The personnel performing compliance tasks attend training on the subject each year in order to learn about best practices from experts in the field.

The onboarding plan for new hirings includes specific training in the Criminal Compliance Management System, the code of ethics, the compliance policy and modern slavery.

A range of actions were undertaken in terms of training and dissemination by different means (intranet, MiALSA, SMS, Internal Communication...) and to different groups of employees, adapting content and ensuring that the scope extends to the entire workforce. In addition, and in order to update employee knowledge and awareness, mandatory compliance training is given every year to all staff, both structural and operational.

In 2019 Alsa obtained UNE 19601 certification from AENOR for Criminal Compliance Management Systems

#### **Compliance Committee**

The COMPLIANCE Committee was established on 7 June 2016 with responsibility for overseeing the

development, implementation and maintenance of the Compliance System as its guarantor, likewise aiming to consolidate a corporate culture of compliance.

#### **Communication Channels**

Any Alsa worker with reasonable evidence of the existence of any conduct, fact or omission that violates the code of ethics or that could constitute a breach of the regulations in force may, in the first instance, convey his/her query or question to a line manager or the Compliance Committee via buzon. compliance@alsa.es.

If, for any reason, the employee considers that it may be not

appropriate, nor possible to request assistance by any of these people, the employee may plan the issue and/or alert through the phone "Help-line" that is outsourced to ensure confidentiality. Alerts are treated in a safe environment by a limited number of employees of the service supplier with the appropriate professional skills.

During 2021, two Helplines opened in Morocco, for customers and employees

#### **ASCOM Awards Finalists**

In December 2021, Alsa was shortlisted in the 5th ASCOM (Spanish Compliance Association) Awards in the company category, along with Grupo Aldesa and Sanitas, which ultimately won the award. A position which serves as well-earned recognition of the track record of Criminal Compliance Management System implemented since 2016.

Asociación Española de Compliance

# Alsa's contribution to the Sustainable Development Goals (SDGs)

The mission of becoming a multi-modal mobility operator involved in community development and environmental care is what sets out Alsa's strategy and therefore its contribution to the Sustainable Development Goals and the 2030 Agenda.

Every one of Alsa's key strategic areas is underpinned by its potential contribution to or impact on the Sustainable Goals.

Specifically and as a priority, SDG 3: Good Health and Well-Being; SDG 8: Decent work and economic growth; and SDG 11: Sustainable cities and communities, are priority goals where Alsa focuses its strategy and efforts.

Equality is part of the company's identity policy and there is a positive impact on SDGs 5 (Gender Equality) and 10 (Reduced Inequalities).

Following the establishment of specific indicators serving to measure the impact generated, medium and long-term objectives have begun to be established during 2021, specifying Alsa's contribution to each of them.

The environmental challenges set to become carbon neutral are the most prominent, along with the objectives relating to safety and equality.

The following table provides an overview of Alsa Spain's contribution to the SDGs in 2021.

All Alsa strategic lines contribute to and are aligned with the SDGs

Long-term challenges were established in 2021 Resumen de la contribución de Alsa a los ODS durante 2021.

## Partnership Management

Alsa has in place a **Partnership Management Model**, under which tools and procedures have been developed and standardized to streamline the identification and validation of new opportunities.

During 2021, progress continued on this model, standardizing and improving processes, aligning them with company strategy and improving communication and evaluation channels.

The company has also continued its commitment to innovation through partnership agreements with R&D+i centres and partnerships with other organizations for the development of joint projects that provide high added value for all parties.

#### Supplier clauses

| Quality Service               | Quality Management System compliant with ISO 9001.       | Good practice clause.                           |
|-------------------------------|--|---|
| Environmental Impact          | Environmental Management System compliant wit ISO 14001. | Energy Efficiency.                              |
| Responsible work policies     | Compliance with requirements under ISO 45001.            | FRC Certification (Family Responsible Company). |
| Engagement with the community | Collaboration with special employment centres.           |   |

#### Shyne

Alsa forms part of the consortium **Spanish Hydrogen Network (Shyne)** with the aim of promoting renewable hydrogen in Spain together with other entities such as Repsol, Enagás, Grupo Celsa, Bosch, Scania and Talgo, as promoters of the initiative and with the participation of 26 other entities, totalling 22 companies and 11 associations, technology centres and universities.

Shyne will be the largest renewable hydrogen consortium in Spain

and will aim to promote rapid and effective decarbonisation through hydrogen, which is one of the keys to the energy transition.

The projects grouped together at the consortium will represent a cumulative investment of 3.23 billion euros, according to Repsol data, which will allow "the launch of different initiatives for the production, distribution and use of renewable hydrogen in the industrial sector, in transport and in other

applications". The project as a whole is expected to generate more than 13,000 jobs.

#### Other major partnership management milestones

Examples of Alsa's commitment to support the management of alliances and innovation in 2021 include development of the following alliances:

#### Hydrogen Bus.

The pioneering deployment of a hydrogen bus, establishing a hydrogen route for Alsa jointly with Toyota/Caetano and Carburos Metálicos. The hydrogen bus has been conducting various pilot tests in urban operations, accompanied by a portable 'hydrogen station' with renewable hydrogen supply.

The initiative culminated in the installation of a permanent hydrogen station in Torrejón de Ardoz for the launch of the first Hydrogen Bus on a scheduled route in Spain during 2022.

Other manufacturers: Mercedes Benz. Scania, Toyota Caetano, Ibizar and Cab-Solaris.

#### Repsol.

Launch of courses of action to improve maintenance systems, testing of new fuels and new ZERO-emission vehicles, as well as development or implementation in other markets outside Spain.

During 2021, the company received the first vehicle to arrive in Spain with a solid state battery for a vehicle in the Oviedo City Service.

Renewed partnership providing the framework for key projects for the coming years related to the ecological transition, including the development of other elements such as Hydrogen, fleet charging poings, gas stations...

First test in Spain with HVO (Net Zero Emissions) eco-fuel on 12 vehicles in the Bilbao City Service.

Participation as promoters of the first consortium for the H2 development at the national level, named SHYNE (Repsol, Bosch, TALGO. ENAGAS, Scania, Celsa and Alsa).

## Digital proposal for sustainable, multimodal and connected mobility

Alsa's digital proposal aims for a new customer relationship model, adopting a comprehensive approach. Incorporating new business models arising from the opportunities that digital elements bring.

The basis of the company's digital proposition is:

- Offer its customers products and services through digital channels, and at all points of contact in the journey, creating a new digital experience as the fulcrum of all management.
- Increase the presence of new digital mobility in the world.
- Make digitalisation a key structural vector for other crucial elements: Efficiency, Environment and Social and Regional Cohesion.
- Develop the digital talent of employees, also contributing to the digitalisation of the sector.
- Make thorough use of data for better decision-making and to reach customers promptly, combining experience and market knowledge with new tools such as BigData, AI, IoT and others.

#### Main Digitalization strands in 2021

### Digitalisation of sales and means of payment

- Continuous improvement of channels: Web, App, Kiosks, Mobi4U.
- Development of initiatives with QR and Account Based Ticketing systems (PAYG and EMV) in urban transport operations.
- Development of a new backend in urban transport, integrated in Mobi4U.
- Renewal plan for selfservice ticket kiosks.

#### Creation of the Artificial Intelligence area for project development

 Initially focused on Safety, Predictive Maintenance and Operational Excellence.

### Non-scheduled transport management

- B2B/B2C platform and deployment of initiatives in VTC management.
- Enhancements to ALSACab
- Creation of a system (Back + front) for the management of transport on demand (TOD).
- Development of sharing models, with SaaS models.

#### **Optimisation systems**

- Deployment of the GOAL tool. Consolidation in Spain and Morocco. Deployment in Portugal.
- Operation service level tracking (Swiftly).
   Consolidation of the new management system at ALSA.
- Creation of a platform for IoT management, data processing and information I/O standardisation.

### Customer experience improvement projects

- CRM evolution: inclusion of Mobi4U users, creation of new journeys.
- Evolution of the Revenue Management System (RMS): Management of ancillaries, management of multimodality, supplementary services.
- Improve customer gateway attributes: Review of onboard infotainment systems.
- Automation of compensation systems and customer incident management.

#### Internal management

- Development of "Chris":
   Digitised management of people processes.
- Development of internal communication tools: Intranet, new app, responsive website, etc.
- ALSA corporate website development.

### People

- Developing people's digital skills. Management model by product. Development and deployment.
- Deployment of associated innovation management models. Working methodologies.

#### Mobility as a Service (MaaS)

- Creation, development and deployment of the "Mobi4U" app.
- Incorporation of 5 cities in 2021 (currently 11 zones)
- Creation of the digital urban payment system, with deployment in January 2022.

#### Main Innovation strands in 2021

### Creation of the "Mobility Menu" concept

- Autonomous Mobility
- Micromobility Sharing & Parking
- Transport on demand DRT & ridesharing (Alsacab)
- Corporate mobility
- School mobility.

Channelling of initiatives through MaaS applications.

Participation in mobility R&D+i projects.

Alsa has been awarded a CDTI
R&D project to boost research
into the development of
self-driving vehicles. It is also
developing an R&D+i project
organised by the Ministry of
Science and Innovation for
the systematic improvement
of roadside service level
indicators adapted to
transport conditions and types

### 2022 Objectives

| Excellence model    | Covid funds.  |  |
|---------------------|---|--|
| Corporate Social    | SR10 certification in Switzerland-France.                               |  |
| Responsibility      | Continue to converge with the Model in other countries.                 |  |
|                     | Strengthening External and Internal Communication.                      |  |
| Alliance management | Promotion and development of the present and future Hydrogen ecosystem. |  |
|                     | Digitalisation for the development of projects under the NextGen Funds. |  |
|                     | Develop and consolidate partnerships in internationalisation.           |  |
| Digitalisation      | Payments in the Mobi4U PPP.   |  |
|                     | Deployment of AI initiatives in transport safety and efficiency.        |  |
| Innovation          | Deployment of new Transport on Demand initiatives.                      |  |
|                     | Research in development of self-driving vehicles.                       |  |

## Safety

### Our approach

ALSA values safety above all else. It only does what is safe and stop any unsafe behaviour.

ELIMINANDO RIESGOS Driving out harm

ALSA's safety management is based on the Driving Out Harm (DOH) projects in place at all companies in the NATIONAL EXPRESS Group. This programme has a clear goal: that safety is the most important and that the company is the best in class in the industry.

### Key figures

|        |   |       | Spain |              |       | Alsa Group |

|        | Occupational safety   |       |       |              |       |            |
|        | Accident frequency index (%)  | 16.46 | 8.64  | $\uparrow$   | 13.56 | _4         |
|        | Accident severity rate⁵ (%)   | 0.53  | 0.27  | $\uparrow$   | 0.48  | _4         |
|        | Absence rate (%)  | 6.26  | 6.87  | $\downarrow$ | 6.7   | _4         |

medical leave. For minor injuries, all accidents are counted.

<sup>&</sup>lt;sup>1</sup> FWI: FWI is an indicator of the severity, in terms of bodily injuries, of the at-fault accidents occurring at ALSA over a certain period of time. It assigns a weighting to the number of deaths, serious injuries, minor injuries and injuries sustained by ALSA personnel with corresponding medical leave registered over a certain period. Only at-fault accidents are used for the weighting of deaths, serious injuries and staff injuries with

<sup>&</sup>lt;sup>2</sup> The total number of accidents within the organisation (at-fault and not at-fault) for every 100,000 kms travelled.

<sup>&</sup>lt;sup>3</sup> Alcolock is a device which immobilises vehicles in the event of a positive alcohol breathalyser test.

<sup>&</sup>lt;sup>4</sup> No data available at Alsa group level.

<sup>&</sup>lt;sup>5</sup> Severity index = (Days lost per year due to accident / (Workers x Hours worked)) x 10<sup>6</sup>.

### Action plan

### Performance in 2021

| % | Comprehensive<br>road safety<br>system | 34% of the workforce<br>monitored by DriveCam. # Comprehensive road safety management system

ALSA values safety above all else. It only does what is safe, with a zerotolerance policy to any potentially unsafe conduct. And does likewise in every country where it operates. Alsa always applies the highest safety measures even when the applicable legislation may be less stringent.

Driver monitoring and training are essential to improving driver performance and reducing accidents. With the application of new technologies, Alsa is able to increase the robustness of its road safety management system year after year.

During 2021, Alsa continued working on driver performance

measurement systems thanks to the implementation of various processes and technologies that provide individualised information on the following parameters:

- Speeding.
- ABC driving styles (accelerating, braking, cornering).
- Behaviour rating for driving events (Drivecam system).
- Periodic driver evaluations performed by accredited trainers.
- Accident rate.

The continuous and individual measurement of these parameters

has reduced claims rates across the Alsa group by 30% since 2010, when the Elimination of Risks programme was implemented.

The accident rate in Morocco has decreased by 61% since 2010

### Predictive driver management using AI techniques

In 2022, predictive models are planned for development, based on available information on individual driver performance, which will allow new correlations between observed behaviours and potential accident risks to be identified.

### Driver competence profile

For each Alsa driver a skills profile has been drawn up, covering their skills and those aspects that need to be improved. With this information, all driving personnel are classified

according to their skills and given an overall score. This is used both in assigning specific services and in preparing training plans tailored to the needs of each individual

#### **Driver scorecard**

Meanwhile, the "driver scorecard" is produced on a regular basis, providing detailed information on the performance of each driver and

their relative position vis-à-vis the other drivers in their organisational

This information is shared with drivers and also helps to monitor and apply any preventive measures deemed appropriate.

### 3 GOOD HEATH AND WELL SCING

#### Feedback to drivers

A system has been in place since 2019 to inform drivers and facilitate monitoring of their performance by their line managers.

During 2021, progress was made in the digitalisation of the process, to provide managers and supervisors with access to the performance data of driving personnel, and so implement any applicable corrective and preventive measures deemed appropriate.

Performance monitoring is performed monthly, with the risk profile score of each driver included in the "monthly driver check-list" application.

#### **How it works**

Using the internal MiAlsa app, drivers can consult all the information and figures on their speeding offences, consumption, driving style, incidents and safety events.

Additionally, managers have been provided with a new corporate tool where they can observe driver performance on a monthly basis and register any contact and talks held with the driver to analyse the recorded conduct.

#### **Results**

The system supports driver engagement and commitment.

It also facilitates driver monitoring by managers, as it allows them to pinpoint specific areas for improvement and set goals.

Leveraging the performance information listed above is an excellent predictive management tool that enables action before significant incidents or events occur

### Driver monitoring software in Morocco

Morocco has developed software (CCTV) to monitor drivers so as to ensure that all drivers on each contract can be viewed over the course of one month. Each driver is guaranteed to be supervised by at least once per month via CCTV.

In addition to these CCTV reviews, each driver is assigned to a Safety Technician who Direct Observation while in service. This Technician performs exclusive performs additional monitoring for safety management tasks, with continuous monitoring of driving safety through direct daily contact with drivers.

All these systems detected training needs that were fulfilled through 9,881 training actions covering a total of 10,296 hours of training.

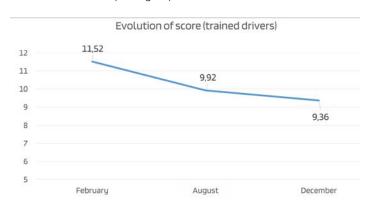

### New practical training model for drivers

In 2021, a new driver training and evaluation model was launched in Spain, with the following features:

- Deliver personalised, hands-on training for drivers with poorer performance, instead of 50% of the driver workforce every year.
- Reduce the frequency of periodic

driver assessments in accordance with the existence of monitoring systems (Drivecam).

65% of drivers trained in 2021 have improved their performance. However, more time is needed to evaluate the effectiveness of this measure since the risk profile takes into account cumulative performance over the past 12 months.

## The bus, a safe space for customers and employees

In 2021 Alsa continued with Alsa Safe Mobility to guarantee public mobility in an environment of safety, trust and peace of mind. To achieve this, buses have become a safe space for customers and drivers by reducing the risks from Covid-19.

The plan covers all times when a passenger comes into contact with the services of the company before, during and after their trip. In addition, the programme analyses and assesses the risks of each of the jobs occupied by its workers, taking appropriate measures to mitigate the risk of contagion.

Measures have been implemented such as anti-Covid provisions for users, identification of non-usable seats inside the vehicle, mandatory use of face masks, systems for renewal, filtering and purification of interior air (bioactive carbon filters in urban vehicles), interior ventilation protocol and monitoring: Mystery Passenger.

Alsa has received Aenor certification of its Covid-19 protocol

#### Air renewal inside buses

Air inside Alsa buses is completely renewed at least every three minutes. These values significantly improve the reference value from Harvard University and IDEA-CSIC, which sets five renovations per hour as an acceptable level of ventilation in order to minimise the risk of contagion in enclosed spaces such as school classrooms.

Alsa long-distance buses have also replaced conventional air conditioning system filters with new bioactive carbon filters, which permanently filter air during travel and remove 99% of particles.

This is supplemented by the additional installation of an ECO3 air purification device which, through ozonisation and ionisation, produces a 99.6% reduction in viral load, as evidenced by the analyses performed by the INTA (National Technical Aerospace Institute).

In addition, in mid-2021 BIOW air disinfection systems were also

installed, serving to eliminate 99.99% of the bacteria and viruses present inside the coach, including the SARS-CoV-2 which causes the Covid-19 disease.

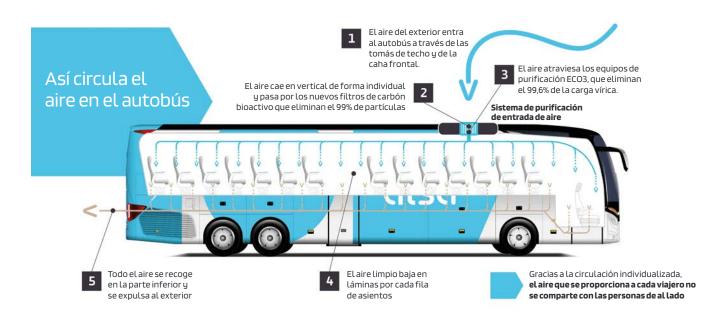

Meanwhile, air entering from the top of the vehicle from the outside, which is permanently renewed and filtered during the journey, reaches the passenger individually from the top of the cab, channelled vertically to each seat. This individualised circulation system prevents the air received by each passenger from being shared with the people next to them.

The combined performance of all these systems ensures optimal air quality inside buses, guaranteeing passengers a high level of protection against infection.

All the above, together with the other measures and protocols implemented by Alsa within its Safe Mobility plan, such as the reinforced cleaning and disinfection of vehicles

and surfaces, the installation of screens and hand sanitiser dispensers, among others, along with responsibility on the part of passengers in wearing a face mask during their journey, make bus travel a safe experience.

New renewal, filtering and purification systems ensure optimal indoor air quality, making the bus a safe place to travel

### Carrying out Covid-19 tests

The company has made Covid-19 testing available to all workers, which can detect if the person has had the illness, if they have it at the same time and could be contagious, or if they have not been infected.

## Employee Health and Safety

"For Your Health" is a programme aligned with the company strategy in the field of health and well-being, with the objective and firm commitment to protect and enhance healthy and happy lives for the people who make up Alsa and their families.

The programme promotes safe, healthy and sustainable working environments, based on the conviction that employee health and safety are a critical factor impacting on customer safety and improving the organisation's competitiveness, productivity, talent retention and sustainability. The programme is supported by the Blue Agents, programme ambassadors who actively collaborate in the dissemination and implementation of programmes and/or actions developed in the interests of safety, health and well-being.

The following initiatives were implemented under the 2021 programme:

The health and safety management system of Alsa in Spain is certified under ISO 45001

### **Healthy Work**

**Zero tolerance**. Alcohol and drug use prevention programme to reduce risks and help all

staff to prevent all issues and problems related to alcohol and drug use,

thereby complying with the Healthy Company principle.

1,064 alcohol tests. 564 drug tests.

**Covid-19 Protection.** Aenor-certified Covid-19 protocol, positive screening and protocol

activations, Covid protective equipment and cleaning for drivers (installation of screens, face masks, gloves, hand sanitiser gel, fixed on-

site gel dispensers).

7,606 pruebas de detección.

### **Healthy Body**

Medical examinations.

Free medical examinations for all staff with early screening for some common conditions, detection of prostate cancer (PSA) in men over 45 years of age, gynaecological tumour markers in women, Epworth drowsiness test and Pichot fatigue test in drivers and total health test in driving personnel.

82% of the workforce in Spain participated in medical examinations.

### New PPE signage at repair workshops

Posters on the rules for the use of PPE have been installed at 48 workshops in Spain. According to the tasks performed by the workers.

### 2022 Objectives

| Monitoring              | Implementation of a smart camera system at Bilbobus.   |
|-------------------------|--|
|                         | Expansion of monitoring systems.   |
|                         | Mystery passenger implemented in Switzerland and France.   |
| Training                | Organisation of public events to raise public awareness of the issue of vehicle blind spots, in particular with e-bikes and e-scooters.          |
|                         | Development of audiovisual material for driving staff to develop technical skills and knowledge of technological innovations added to the fleet. |
|                         | Workshop safety training for all maintenance personnel.  |
| Eliminate risks         | Consolidation of DOH in new operations (Granada, Jaén).  |
|                         | <b>Predictive management</b> of drivers by means of <b>Artificial Intelligence</b> techniques.   |
|                         | Installation of blind spot panels across Spanish fleet.  |
|                         | Adaptation of the safety visit procedure.  |
|                         | $Forums: accident investigation \ committee \ and \ technological \ innovation \ observatory.$   |
|                         | <b>Accident rate analysis in each transport contract</b> and definition of action plans agreed with each local team.                             |
| Facilities and<br>fleet | Fleet adaptations (zero fire programme, zero wheel loss programme).  |
| rteet                   | Implementation of risk assessments, action protocols, periodic inspection plans.   |
|                         | Installation of reversing cameras to cover the entire fleet in Spain.  |
| Health Promotion        | Quarterly communication campaigns for <b>driver health problem prevention</b> .  |
|                         | Qualitative and quantitative studies to assess the <b>psychosocial situation in Spain</b> , <b>Switzerland, France</b> .                         |
|                         | Face-to-face workshops on key health aspects.  |
|                         | Online training for <b>structural staff</b> on ergonomics, first aid and emergencies.  |
|                         | Agreement with other entities to <b>provide access to health services</b> .  |

### Our approach

Customers are at the heart of everything Alsa does, and it therefore works relentlessly to meet their expectations.

Covid-19 again had a major impact on personal mobility in 2021. The restrictions imposed by the state of emergency (in force until May) were accompanied by successive waves of contagion, pandemic control measures and negative social perceptions towards contact with other people.

In this challenging background, Alsa has continued its transformation, gradually resuming levels of activity, customer insights and business performance KPIs thanks to its strategy and teamwork.

In the Customer area, decisive initiatives have been deployed to restore customer confidence and strengthen the value of the new brand.

### Key figures

### Action plan 2021

RECOVERY OF THE PROPERTY OF TH

150 Safe

Restore customer said satisfaction

### Performance in 2021

Recovery of service supplu Pre-pandemic mileage provision:

- 64% on long-haul services.
- 88% on regional services.
- 100% on urban and metropolitan services.

Removal of occupancu restrictions on board

**Continuous** improvement and communication of Alsa Safe Mobility Specific indicator for the evaluation of Alsa Safe Mobility measures for customers, with daily and weekly dissemination of results.

Actions based on customer insights, emphasised in implementation excellence and internal and external communication.

**Customer metrics** in urban and metropolitan services

New channel for measuring satisfaction and reporting incidents on board for use during travel. Based on QR codes and continuous tracking of comments received.

Satisfaction studies performed on the main contracts.

Initial "noncustomer" studies in urban services.

**CLSC** New brand image across fleet and stations

Progressive deployment of the new brand across the fleet and all types of service.

Implementation of brand and corporate identity at 17 stations during 2021.

Restore customer confidence and satisfaction

**Customer metrics** 

(ISC. NPS. CSR. NEV) in progressive recovery. The general Satisfaction study for 2021 shows levels similar to the pre-pandemic: CSI 8.07 in 2021 vs 8.03 in 2019: NPS 47% in 2021 vs 46% in 2019.

**Transformation** and digitalisation of the sales network

New concept of information and sales points at stations, in line with the new brand and digital strategy, including a new self-service ticket machine channel.

Improvements to digital channels: new regional and urban apps, Mobi4U MaaS app (Mobility as a Service), Alsa Corporate, Bus direct. In addition to digital vouchers, website improvements, etc.

Personalised customer communication and growth of the Alsa Plus programme

Alsa Plus:

- 1.6 million customers.
- 195,000 new registrations.
- 20 messages+ sent via CRM.

Customer Care System:

- 130,000+ written communications handled.
- 24,199 complaints handled.
- 2.3 day aberage response time.
- 7.5 CSI score for Customer Care.

New social media customer service tool. Growth in followers across all networks: Facebook, Twitter, Instagram...

### Alsa Safe Mobility

The Alsa Safe Mobility programme was one of the cornerstones of the customer strategy in 2021, as in 2020.

Work has continued to redesign and update the Alsa Customer Gateway, with the aim of turning the bus into a safe space to travel, mitigating the risks arising from Covid-19 and offering customers maximum confidence.

Interior air is estimated to be fully renewed every 2-3 minutes for the intercity and metropolitan fleet; and every 1 minute in urban services

### Updating standards and continuous improvement

- Constantly updated communication across all channels and stages of the journey.
- Information on board vehicles: posters, announcements, temporary notices, etc.
- New procedures and operating instructions, aimed at improving aspects such as interior air renewal, ensuring compliance with on-board standards, vehicle cleaning and disinfection, etc.

### On-board air quality and renewal guarantees

- Interior air renewal speed and quality tests on the urban, metropolitan and intercity fleet carried out by an independent entity.
- Installation throughout the fleet of air purifiers and bioactive carbon filters.
- Implementation on the long-distance fleet of a world-first bioengineering device developed jointly between Alsa and BIOW, which eliminates all types of nanoparticles and microorganisms thanks to successive layers of air filtration and treatment.

#### **Safety Guarantee**

Alsa performs air quality and renewal tests on its fleet. **Interior air is estimated to be fully renewed every 2-3 minutes for the intercity and metropolitan fleet; and every 1 minute in urban services.** 

### Certificates and recognitions

- Renewal of the AENOR Covid-19 Good Practice Certificate, thereby
  maintaining Alsa's leading position, as the first company in the mobility
  sector in Spain to obtain this accolade. It has also been awarded for all
  services in Switzerland and France and all services associated with the Alsa
  Safe Mobility programme.
- "Biscay Safe Destination" seal of approval from the City Council of Bilbao, for SICTED Advanced Covid-19 Good Practices.

### **Customer Experience**

### **BCX Seal of Excellence**

Once again, Alsa has been recognised as the "Best 2021 company for customer experience in the global transport sector", which includes Spain and Latin America. With this renewal, Alsa has established itself as a national and international benchmark.

### DEC Customer Experience Excellence Awards

Alsa was honoured in 2021 in the best Customer Gateway initiative category for Alsa Safe Mobility, at the eighth edition of the "DEC Awards" handed out by the Association for the Development of Customer Experience (DEC), which annually recognises best practices for excellence in customer experience in Spain.

### Measurement of on-board experience in urban and metropolitan services

Alsa has begun to implement a new methodology to ascertain passenger opinions on urban and metropolitan routes, furthermore facilitating the communication of service incidents. The first implementations were carried out in Granada, Bilbao, Jaén, Ferrol and La Coruña.

### UNE 16880 certification of service excellence

The Urban Transport service in the city of Bilbao, managed by Alsa, achieved this certification based on the creation of exceptional experiences through service excellence. It is the first passenger transport service in Spain to achieve this certification.

### We listen to You every day

Tell us how we are doing

- 2. Scan the QR.
- 3. Rate today's service.

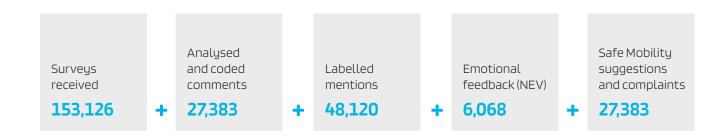

### Customer knowledge

Alsa has continued to work hard to increase its customer knowledge by implementing initiatives such as:

- An study into the importance of service attributes for customers, enabling us to update satisfaction levers on the post-Covid scenario and focus improvement guidelines and policies on real needs.
- Operationalisation of the customer experience (OCX), with customised reports by group, daily/weekly/monthly KPIs, explanatory infographics, etc.
- Consolidation of the Customer Voice programme, with indicators such as:

### Satisfaction returns to pre-pandemic levels

The general Satisfaction study 2021, prepared by QBO in December 2021, puts customer satisfaction at

levels similar to those prior to the pandemic:

| Year | ISC<br>(Customer Satisfaction Index) | NPS<br>(Net Promoter Score) |
|------|--------------------------------------|-----------------------------|
| 2019 | 8.03                                 | 46%                         |
| 2021 | 8.07                                 | 47%                         |

### Product improvement

### New next generation services for customers

In 2021, new mobility services were launched throughout the country, as a result of tender processes or acquisitions, such as the Urban services in Granada and Jaén and the Seville tourist bus; in the concessions La Coruña XG-881 and Ferrol XG-642; Alcantarilla – Murcia MUR-001 and Cartagena MUR-004, and the Santa Lucía Urban service in Las Palmas de Gran Canaria.

In all of them, network improvements are being implemented with much greater capillarity, on-demand routes, comprehensive fleet renewal, new information and sales channels, monetisation or the latest generation, accessibility, intermodality, energy efficiency, etc.

#### Apps for regional and urban services

Apps have been launched with real-time information on bus location, transit times, time estimation, geolocation, QR at stops, etc. Implemented (among others) for services in Asturias, Cantabria, Cartagena, Galicia, Granada, Ibiza and Jaén.

### New Mobi4U MaaS App (Mobility as a Service)

The App helps to offer all the mobility services available in a region for any journey that the customer plans, in a single app. Established in Almeria, Asturias, Cantabria, Granada, Rabat, Region of Murcia and Vélez-Málaga.

### Digital vouchers

In 2021, new digital vouchers were also implemented across the country (Andalusia, Cantabria, Galicia, etc.), alongside improvements to their conditions of use. For example, AlsaPlus customers can now issue vouchers for other passengers, although the redemption will remain associated with their owner.

### **Alsa Corporate**

New service made available to companies and institutions to transport employees and groups. The App gives users re-

al-time information about where the bus is, and instant notification of incidents or delays.

### Onboard coin handlers with contactless payment and card payment

New equipment that improves the embarkation user experience, through validation of QR codes and card payment, for example, in the CTA (Asturias Transport Consortium).

### New customer services

### Alsa Accessibility: Mobility for all

Alsa remains committed to inclusive and accessible transport that meets everyone's mobility needs. Numerous improvements were implemented in 2021, including measures for urban transport in Bilbao:

Collection of packages at stations

In 2021, collection points for AMAZON Locker packages were expanded, with more than 76,000 packages collected. And an agreement was signed with PUDO-ALIEXPRESS to add them to the network.

Diagnosis of accessibility needs.

Route accessibility study.

100% of the fleet with ramp and reserved PRM/ Wheelchair User space.

Availability of taxi for PRM if waiting time is more than 15 minutes.

Accessible information: posters in Braille, Oral Information System, videointerpretation, etc.

Seminars held with Accessibility associations.

Inclusive and standardised treatment training.

New improved infrastructure: hearing loop, tactile paving, etc.

### On-demand transportation solutions, safe routes and stops

New services have been developed on low-traffic and on-demand transport routes, usually in rural areas, with vehicles specific to these types of lines and technological developments for booking and payment. Notable initiatives include Castile-Leon, Madrid Region, Catalonia, Andalusia and Extremadura.

In addition, in coordination with the Administration, ondemand night bus stops are being implemented in urban and metropolitan areas where the customer is offered the possibility of requesting a stop at any point along the urban route, thereby increasing their safety.

#### Urban service in Casablanca

During 2021, the roll-out of the new Urban Service in Casablanca was a particularly major development, with the introduction of 700 new vehicles and the modernisation of an urban service of the standard required by Morocco's largest city, with more than 4 million inhabitants, and the main economic and commercial hub in the country.

Particular efforts have been made to restore quality levels in:

- Creation of a customer service centre.
- Opening of 4 commercial agencies in different parts of the city to revitalise and encourage the use of public transport.
- Launch of the website www. casabus.ma and social networks on Instagram and Facebook.
- Creation of an urban transport museum.

- New complaints management service, which handled 2,860 complaints with an average resolution rate of 100%. More than 2,143 requests for information were also processed, an increase of more than 1440% from January to December due to the customer outreach actions undertaken.
- Customer satisfaction management. Notable results were obtained in the Ipsos survey in Casablanca, where the average score amounted to 7.7, and 63% of users describe themselves as very satisfied.

### Information and sales

### Improved flexibility and ticket sales

Alsa remains committed increased fare flexibility through different operational approaches:

- Design of a new flex fee applicable to all fares to modify/cancel tickets without surcharge.
- Improvement of Flash Sale conditions allowing changes.
- One-off flex fare conditions increasing guarantees to passengers at peak times.

### New self-service machine channel

To adapt this channel to increased sales digitalisation, physical and interface improvements have been implemented on this platform to improve its usability, image and customer experience.

### Block the adjacent seat

In 2021 more than 75,000 passengers enjoyed this product which allows the user to easily ensure they travel without another passenger alongside, also available via the apps.

### Alsa brand

The transformation of our points of sale was progressively undertaken during 2021 with the aim of improving brand visibility and customer experience, while also allowing for improved functionality at the stations.

The actions taken cover both a corporate image facelift and improvements to the sales agent workstations and driver rooms. All signs and signage have been simplified.

to make them more intuitive, with new furniture and the branding elements giving these points a recognisable and uniform appearance throughout Spain. Meanwhile, application of the new brand continued to be rolled out to the most prominent assets: the buses.

In 2021 a total of 17 bus stations were converted in the main Spanish cities with the greatest ALSA passenger flows

### Customer service and social media

#### ISO 10002 certification

The Alsa Customer Care System has obtained certification 10002 for the handling of complaints and claims, which ensures not only the proper receipt and recording of complaints, but also corrective

actions taken to prevent them from reoccurring, while keeping the customer informed as to their resolution status.

### Customer Car by phone, e-mail and social media during Storm Filomena

In January 2021, Storm Filomena struck Spain between 6 and 11 January, coinciding with the mass return from Christmas holidays. In terms of Customer Care, there was exponential growth in the volume of communications received from customers. In particular, social media represented a 900% growth in interactions and 700% in users handled compared with the previous week, despite which they rated the attention received with a CSI of 9.5.

### New Social Media Customer Care management tool

A new comprehensive social media management tool, Clarabridge Engage, was launched in mid-2021. A major qualitative leap forwards, especially in terms of customer service, since it allows for better service by facilitating processes with the Call Centre Social Media team, integration of Instagram interactions, automations, etc. This results in greater professionalism and standardisation of customer care via social media.

The tool also allows online brand reputation tracking and monitoring.

### "Alsa por amor" ("Alsa for love"), trending topic on Twitter on February 2

Following a spontaneous interaction by a user asking "Have you taken an Alsa for love?", a stream of positive conversation was generated with numerous humorous and engaging interactions that led #AlsaPorAmor to be trending topic on Twitter with a total of 183 thousand impressions on February 2.

The trend also had an impact in the national press (20 Minutos, La Vanguardia, Onda Cero, La Sexta...)

### Marketing and communication

### Christmas arrives when you arrive. Christmas arrives with Alsa

The 2021 Christmas campaign was broadcast on TV (national and regional) and digital channels (social media, CRM and display). With the aim of positioning Alsa as the best Christmas travel option, for price or capillarity, and communicating the brand's new purpose:

"At Alsa, we bring people closer together and connect the world in a Safe and Sustainable way"

### Winning the hearts of the citizens of Casablanca (Morocco)

As the new urban transport provider in Casablanca, and after consolidating its new fleet and service, at the end of the year Alsa launched a campaign to reach

consumers in the most emotional terms and to highlight specific benefits in their daily lives:

## Punctuality Safety Reliability

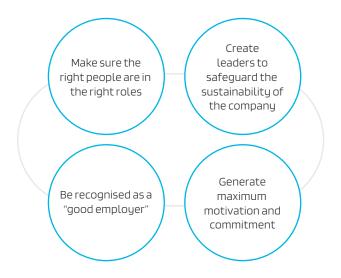

### 2022 Objectives

| Recover demand and revenue | Re-establishment of service provision levels and new position in highly competitive intermodal corridors.   |
|----------------------------|---|
|                            | Enhancement of capabilities for Pricing, Revenue Management (RMS) and ancillaries.  |
|                            | Information customisation and sales via CRM.  |
| Enhanced Satisfaction      | Get our satisfaction KPIs back to pre-pandemic levels.  |
|                            | Extend CSI and NPS metrics in urban/metropolitan areas and analyse the feelings and perceptions of our passengers.  |
|                            | Operationalise the customer experience: continuous improvement based on customer quotes, training and awareness initiatives, etc.   |
| Excellence in service      | Alsa Safe Mobility as a guarantee of safe travel.   |
|                            | Continue the implementation of our Accessibility Plan.  |
|                            | Increase service value with improvements and innovations in all new products: scheduled intercity lines, urban and metropolitan transport, BTC segment and Corporate clients. |
| Digitalisation             | Transformation of our sales network and improvements to self-service kiosks.  |
|                            | Sales growth in digital channels and improvements to our onboard systems.   |
|                            | Extension of our "Mobi4U" MaaS (Mobility as a Service) and app and regional an urban apps.  |
| Brand Value                | Continue the implementation of the new branding across the Fleet and Facilities, and position it in BTC and Corporate.  |
|                            | Customer loyalty and retention.   |
|                            | Focus on advertising and communications.  |
|                            |   |

### Our approach

Over 2021 Alsa has focused on the continuation of the policies on equal opportunities and on the professional development, with a focus on the digital transformation of the company.

### Staff per province

The working sites with the highest number of employees are in Bilbao, Madrid and Oviedo.

## Equal opportunities

### Equal opportunities for male and female employees

Based on the commitment to equal opportunities, Alsa applies policies and measures to remove the barriers to access employment and the development of the employees

The company has been focused over the last few years to increase the

number of women in the workforce. A proof of that is the work developed to increase their contribution to ODS 5 on gender equality and the commitment made.

So in 2035 the percentage of women in Alsa Spain reaches 25%.

### **Projects and Initiatives**

#### Equilibra ("Balance") Plan

- Protocol More Women, Better Companies.
- Progresa Project CEOE 2021.
- Equality and Work-Life Committee.
- Awareness campaign.

#### **Equal opportunities**

- What are you capable of?
- Agreements.
- Charter in Diversity.

### Equilibra ("Balance") Plan Strategy to ensure equal opportunities

Alsa has developed an ambitious equality plans several actions to increase both the number of female drivers and women in senior positions.

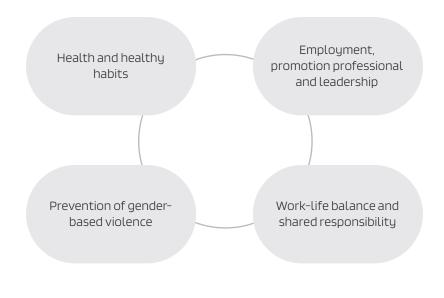

The Equilibra Plan arises out of the intention of reinforcing female presence in all job positions in Alsa.

In 2021 the plan was updated and approved with objectives set for the next 4 years.

#### Protocol, More Women, Better Companies

Aimed at engaging further women in the decision–making processes in economic and business environments, the initiative "More Women, Better Companies" provides the tools required to companies, entities and women.

Alsa joined this initiative since 2019, and the objectives established for 2023 in Spain are:

- In pre-management positions from 24% to 34%.
- In management positions from 10% to 20%.
- In the Exec Management Committee, from 7% to 20%.

### Progresa Project CEOE 2021

Alsa continued to support the specific training for female managers and premanagers. In 2021 the company joined the Progresa Project to promote the professional development. This programme is an initiative created to promote female talent, aimed at driving a change in the companies and in overall society, contributing to a leadership business model with a richer, further scope. Progresa is more than a training programme, it is a plan targeted for the individual development for emerging leaders looking fro strengthening its skills, an in leadership areas to apply for high-level senior positions, driven by personal and professional growth.

### **Equality Committee in Morocco**

The Committee was created by employees from across all cities and job positions in order to make progress towards diversity and gender equality within the company.

The members of this Committee were trained by experts,

Becoming mentors and tutors of reference in each position to assist and provide support all along the process of new recruitments of female employees, within the plan of 100 Female Drivers.

The good performance in this area achieved the Diversity Badge recognition,

recognising Alsa Morocco efforts to help women to access the market place and to support disadvantaged groups, and to encourage equality.

### Financing of the driving licences for women in Morocco

Alsa works in Morocco to improve equal opportunities for male and female

employees in their environments. Aimed at supporting female recruitments in the company, financial support was provided for 7 driving licences in Rabat and 21 in Casablanca, as many women wish to join the labour market as drivers, but are not able to bear the costs for obtaining a driving licence.

### Awareness campaign

Alsa continues engaged in several campaigns, both internal and external, to encourage equal opportunities between men and women. Main highlights in 2021 for the 3th Edition of Women's Week in Alsa:

| 3th Edition of Women's                 | 3th Edition of Women's Week   |  |  |  |
|--|---|--|--|--|
| Raising awareness and engagement.      | Released a video featuring the Managing Director to raise awareness and promote the participation in the activities programmed.   |  |  |  |
|  | Two round-table discussions with the EMT and Interbus.  |  |  |  |
| Driving Out Violence<br>Against Women. | Alsa celebrated the <b>International Day for Driving Out Violence against Women</b> joining the Ministry of Equality to release the "Violent Point", a project intended to engage society in the fight against gender-based violence, working to ensure a safe environment for the victims.   |  |  |  |
|  | This is a symbol, a signal for women to know that an area, place, association or person is available for them to listen and assist them, and raising awareness of a full care and protection programme.  This is also a guide for the people close to the victims, working partners, friends, family members, neighbours, etc., so they can obtain information on how to act in case of violent events against women. |  |  |  |
| Integra Foundation.                    | Delivered two workshops with the participation of 9 female Alsa employees, attended by 26 women at risk of exclusion.   |  |  |  |
| Training workshops.                    | Training workshop in partnership with Red Cross, involving 3 female drivers from Alsa and 2 female colleagues from the People Division. Over 70 people attended the workshop.   |  |  |  |
| Focus Group.                           | Completed 5 Focus Group on gender-equality with the participation of 43 people, including the drivers.  |  |  |  |
|  | 86.2% considered these working groups are useful  |  |  |  |

### **Equal opportunities**

The company has a commitment to equality and inclusion of all people, and joined different initiatives and projects to take further steps, together with other companies, in order to drive a cultural change to ensure real equal opportunities for women, people with disabilities and groups at risk of social exclusion.

### Alsa joins the Partnership #CEOPorlaDiversidad

Alsa joined a pioneer initiative in Europe #CEOforDiversity This partnership, led by Adecco Foundation and CEOE Foundation, set as their mission to Gather the managers from the biggest companies to share a common, innovative vision on diversity, equity

and inclusion (De&I), acting as drivers and ambassadors to help growing the strategy development towards business excellence, talent competition in Spain and to reduce inequality and exclusion in the Spanish society.

This 2nd Edition included a total of 70 companies, sharing the commitment to have a deeper insight on the policies and strategies on diversity, equity and inclusion, welcoming a partnership model and seeking for synergies across the companies involved. Several surveys will be conducted for the CEO,s working sessions with operational teams and advising actions by people expert in this.

#### **Charter in Diversity**

Since 2013, Alsa has been working on its commitment with the Charter in Diversity to encourage:

- Main principles on equality.
- Respectful approach to the right of inclusion of all people, regardless their different profiles, both in society and in working environments.

- Recognition of the benefits that bring cultural, demographical and social diversity in their businesses.
- Implementation of specific policies to encourage an unprejudiced working environment in terms of employment, training and promotion.
- Encouragement of non-discriminatory programmes for disadvantaged groups.

### What are you capable of?

Alsa implemented a few years ago the programme What are you capable of?, building on its commitment to improve inclusion through employment. The programme aimed at training integrating and employing people with disabilities. Showing that companies must have a key role in their commitment to society.

#### **Agreements**

Also, the company has signed several agreements with companies and foundations to encourage and ensure equal opportunities.

#### **Mashumano Foundation Agreement**

ALSA as a company works for the inclusion of all people, committing to female talent, people with disabilities and at risk of social exclusion. The company is involved in the "mashumano" Business Network to make a difference and to highlight the values of equality, work-life balance, ethics and solidarity "Máshumano network" is aimed at sharing knowledge to make companies more human, to promote business policies that build on people development.

#### **Mashumano Foundation Agreement**

Alsa provides funds to the work done by the Foundation Mujeres to help Victims of Gender Violence. The funds will be fully used to the provision of Funds for Scholarships Soledad Cazorla Prieto. This is intended to protect and support orphan children victims of gender violence.

#### Agreement with the employment Agency of Madrid

Alsa works in partnership with the Employment Agency of Madrid to deliver training courses for driving professionals, mainly to unemployed women.

### Sponsors of Integra Foundation

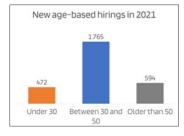

Alsa is a partner company and sponsor of the Integra Foundation since 2001. Foundation Integra is a non-charity entity committed to labour integration of people at risk of social exclusion. In the Foundation they help them to find a job allowing them to start a new life.

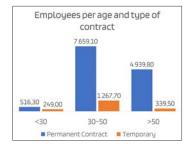

## Quality employment and talent management

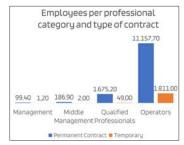

People are key for achieving the objectives set by the company. For Alsa, having a well trained, engaged

staff is key to face both present and future challenges.

2,800 people have joined in 2021

People that have joined in 2021 from 30 to 050 years old

Group workforce

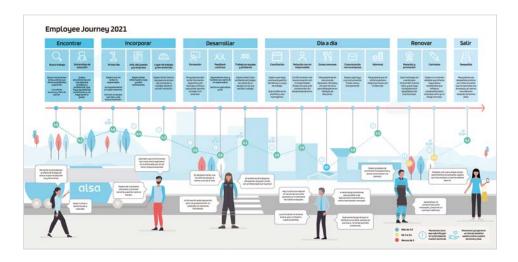

Ohns a permanent
Owork contract

67% for people ounder 30 years old

#### **Employee Journey 2021**

In 2021 the Journey Employee was updated, with an improvement in the level of Satisfaction in each of the stages (recruitment, hiring, joining, development, day-to-day development) compared to 2018.

To be highlighted the positive evolution identified in the questions "I feel energetic and have the spirits to Perform my work properly", 87% replied that they feel energetic; "probability of looking for another job outside Alsa" almost 80% replied that this may be UNLIKELY; and "you think there is equal treatment and opportunities between men and women in Alsa" 86% answered Yes to this question.

87% I would recommend Alsa as a good company to work for

#### Talent assessment

A Talent Assessment is conducted every year to identify the needs to support people development, rolling out an Action Plan based on people ambition and preferences in the company.

These Action Plans have associated self-development actions and training actions (languages, soft skills, advanced training, Mentoring, Coaching, etc.).

Chris tool provides on-line training to all employees. This platform allows each person to individually complete the training courses and itineraries available. Switzerland and France have implemented this platform over 2021.

#### Alsa joined the PICE Programme for youth employment

The Chamber of Spain and Alsa have signed a framework collaboration agreement in order to promote employment among young people, under the framework of the Global Programme for Qualification and Employment (PICE), co-financed by the European Social Fund.

By virtue of this agreement, both entities will design training actions targeted for young people to become bus drivers, with job intermediation actions and assistance to help young people to be trained and work as bus drivers.

#### Muévete programme

The Muévete ("Get moving") programme was created over six years ago to afford professional training, university undergraduate and post-grad students the chance to carry out practical placements at Alsa and acquire new skills at a sector-leading company.

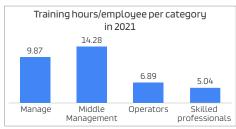

### Customised, pro-active training

Alsa changed training processes to leave behind general, low-impact training for staff, to engage in refreshed training addressing the particular needs for each employee. This customised approach was possible thanks to the monitoring and follow-up of all staff, allowing the company to identify the areas for improvement of each person specifically in order to conduct training actions in a pro-active manner.

First, work started initially with employees identified as entailing further safety risks for the operations

Communication played a key role in these new processes. Line managers of drivers met with the people attending the training course and exposed the improvement areas on the data available. When the individual attends the course, the trainer has already prepared a number of theoretical and practical contents on the specific skills to be improved, that are already known by the driver and that were previously reviewed by hem. This improvement in the training project was one of the four practices winning the 19th Edition of the EXPANSION Awards to the Innovation in Human Resources.

The improvements of this Alsa training project was one of the winners of the 19th Edition of the EXPANSION Awards to the Innovation in Human Resources

### Initial support to drivers

One more year, support and time was invested in ensuring that the new drivers recruited in Alsa received full training and support to carry out the services, with safety as the main priority.

Following a demanding recruitment process, each individual is assigned to a mentor that will carry out a follow-up over the six first months of driving for Alsa. The induction plan includes both training actions (in-house and e-learning) and a number of assessments to help identifying the improvement areas of each person, taking into consideration this information the training can be customised depending on the needs of each employee.

More than 8,000 hours spent in 2021 to escorting/ assistance tasks

### Research project

Under the framework of a **research project** proposed by the Research Centre of Nebrija in Cognition (CINC) and the Alsa Human Resources Division, a pilot project was launched to explore the relationship between some basic indicators in labour performance of drivers in the company, and their cognitive profile.

The objective of this project is to develop a specific assessment of the cognitive skills of bus drivers, seeking for the profile of a good driver. Later, this may be used to orientate the training of this skills through specific, customised training for the cognitive development.

70 employees took part on this as volunteers

### **IRU Road Máster**

Alsa continued working in 2021 with IRU in the certification of their drivers. This certification process allows to:

- Validate the recruitment and training systems.
- Retain and attract talent.
- Strengthen the Master Driver programme.
- Improve efficiency and safety standards.

The certification includes two parts, one practical to assess a safe, efficient management of the vehicle, and the capacity to solve incidents during the service; and a theoretical part including an assessment on knowledge related to the daily activity of a professional driver and a test on the skills to identify a dangerous event, and the perception of risk management.

72 people successfully passed the assessment process in 2021

### Driving simulators are progressing aligned with the digital transformation

In Alsa, we remain committed to the use of the **new technologies applied** to safety and training. We are collaborating with the manufacturers of simulators in the research and investigation of new virtual reality systems applied to driving simulation.

The use of this technology offers a wide range of training possibilities and the interaction of drivers with different scenarios and situations.

### Training of new trainers

The team of trainers certified by Alsa includes drivers with extensive experience and training, working to support drivers from the moment they join the company.

Over 2021, three trainings of new trainers certified by Alsa have been completed, with an increase of staff by 16 people. Also, training sin updating and refreshing the group of trainers have been conducted.

140 people are working to develop drivers

+ de 20,000 training and assessment actions over 2021

### Management of work-life balance

Almost a decade ago Alsa was certified as Family Responsible Company (FRC) in Spain. This certification recognises each company with a management model promoting balance between work and personal life, with policies and measures with this purpose.

These measures are used by employees to have further flexibility and support to establish a further balance between personal and work areas.

| FRC measures implemented              | 2019 | 2020 |            | 2021 |
|---------------------------------------|------|------|------------|------|
| Quality of employment                 | 19   | 19   | =          | 19   |
| Flexible hours and locations          | 14   | 14   | $\uparrow$ | 15   |
| Family support                        | 19   | 20   | =          | 20   |
| Personal and professional development | 15   | 15   | =          | 15   |
| Equal opportunities                   | 5    | 5    | =          | 5    |
| Leadership and management styles      | 3    | 3    | =          | 3    |

### Model of remote work

Alsa launched in 2021 a new measure to promote flexibility: the possibility of working remotely.

The company implemented remote work for office-based staff for one day a week and a second day per month, so they can work remotely. To replace the remote work day per week, Alsa offers the opportunity to their employees to work remotely in the afternoon shift.

Alsa aims to keep adding up measures to help setting a balance between work and personal life for the employees of the company.

Alsa developed work-life balance measures and offers social benefits in other countries where the company operates, as the benefits in Morocco for families, thanks to the agreement with big companies (for example, with discounts to access internet, have a life insurance policy, access to better conditions and mortgages or discounts in supermarkets.

In Switzerland, the company also reached agreements with local companies, like the travels and tours with the entity to preserve the Mont-Blanc environment, or the discounts for both employees and families in the ski resorts, in partnership with CMB & Mont-Blanc Natural Resort.

### Feeback for employees

In 2022 it's being launched a global employee survey for the company's employees. This type of surveys are being conducted at the national level, but for the first time, it is being launched globally across the Alsa Group in 2022.

### Development of work-life balance measures and social benefits in Morocco

Alsa works to improve social benefits for the employees in Morocco, provided the limited contribution by the State in this matter. With this purpose, we are developing actions several actions, as follows:

- Collaborations with companies, health-care centres, pharmacies, etc. to have more accessible prices for employees.
- Implementation of a medical insurance in 2022 for all employees and their families.

### **Healthy Company**

Alsa was awarded in Spain the certificate on Healthy Company, certified by AENOR.

This certificate recognised that the company has in place a management system to promote and ensure health and safety of our employees, and the sustainability in the working environment.

Alsa strongly believes that both the physical and psychological well-being of employees is key to perform their job, so the company has developed the programme "For your Health" with a clear objective in mind: to protect and promote healthy and happy habits for all people in Alsa, as well as for their families. The programme promotes safe, healthy and sustainable working environments, strongly believing that safety and health are a key factor to promote competence, productivity, talent retention and sustainability in the company.

The programme develops several actions detailed in the chapter of Safety, and some additional actions to promote health, as the Health Programme Gympass Wellness to keep healthy habits at home:

life classes on healthy eating, mental health, personal trainers and raffles to win biometric bracelets for employees who have an account in Gympass, and distribution of fresh fruit for employees.

### Safety, prevention and health

Alsa gave pink face coverings on the International Date of Breast Cancer to raise awareness on the importance of early detection of this disease.

Also, it was encouraged that colleagues shared their pictures.

### **Alsa Community**

In 2021, addition of further contents to Alsa Community, with entertainment campaigns for employees and contents on well-being, health, safety, family and recipes, and promote interaction between colleagues.

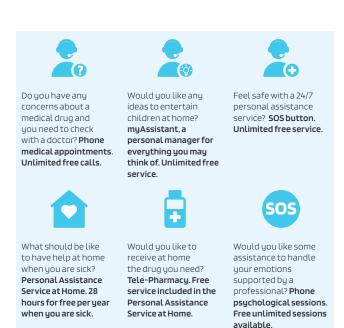

19 campaigns for employees

417 contents for employees

1,439 employees registered

### ALSA helps you

With the COVID-19 pandemic it was launched the programme "ALSA helps you" to help Alsa employees and their families to stay safe, and to provide a better balance in workpersonal life conditions.

### **Senior Committee**

For Alsa the senior group is key, and also to improve and reinforce the link with those people who have retired from the company. The company launched the Seniors Committee, offering benefits to the members joining.

However, in 2021, as a result from the pandemic, no face-to-face meetings were held with the retired employees in the Area Units. But the "2nd Edition of the Contest Alsa Stories" was held on-line, recognising key stories, curiosities or events, and any other information considered important by the participants during their work life in Alsa, where they were involved as key players or witnesses.

The Bus Plus Card for Retired people and their partner.

Provides discounts in EXIT establishments.

Organisation of events.

Information on news and key issues.

Voluntary actions at the local level.

### **Alsa Values Awards**

As every year, the best way to recognise the effort and commitment by both individuals and teams in ALSA is to publicly recognise them in the VALUES AWARDS Event. We reward 3 categories per each value. This year we gave 10 individual awards and 5 team awards. Per regions, Switzerland received an award and Morocco received 4 awards.

Beyond the individual contributions, this year we recognised teams work to further extend our business, and the addition of new teams, as well as high-level environmental actions.

This is an award from 2021, but it is a recognition of the work done by everyone in the campaign for the war in Ukraine in 2022, providing transport to more than 1,000 refugees, collaborating in campaigns to collect supporting material and the involvement by more than 100 volunteers, and a fund raising campaign for UNICEF including employees and customers.

# 2022 Objectives

| Equal opportunities   | Implementation of the recruitment process in Switzerland, Portugal and Morocco in the same website as in Spain.        |
|-----------------------|--|
| Managing Talent       | Talent evaluation in the Morocco and International Divisions with 550 people involved.                                 |
| Quality of employment | Planning and Evaluation of Objectives (DPO) through Chris.   |
| Health                | Implementation in Morocco of a medical insurance for all employees and their families to improve access to healthcare. |

# Community and Environment

## Our approach

As a family responsible company, Alsa plays a key role to impact directly in the quality of life of the communities we serve.

In this sense, Alsa implements the COMMUNITY AND ENVIRONMENT VALUE by launching environmental policies and social actions to help improving the environment where we serve

# Key figures

# Leading the Environmental Change: Sustainable, Smart Mobility

Energy transition and the fight against global warming are crucial and it is established by the EU Green Deal and the Sustainable, Smart Mobility Strategy, setting clear carbonization objectives until 2050 and a very demanding target in 2030 with a reduction of emissions by 55%.

Transport is a key player to achieve this target.

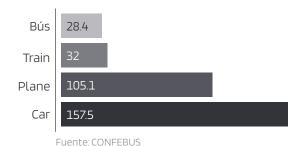

"To be carbon neutral by 2050 will only be achieved reducing the emissions produced by Private vehicles and particularly by promoting Public Transport"

Transport represents 25.4% of the total Greenhouse emissions in Spain. Transport by road is responsible for 89.2% of the Greenhouse emissions in Transport, and from them 53.2% come from private car and motorbikes.

In Spain, only 0.2% of vehicles are buses.

Promoting the use of Public Transport and the associated policies to reduce the use of private vehicle is the right pace to reduce Greenhouse emissions, particularly if we consider that bus causes up to 5.5 times less emissions, in terms of passengers per km, than private vehicle.

Greenhouse emissions per mode of transport (CO<sup>2</sup> gr equivalent per passenger-km).

Bus is the transport mode with less greenhouse emissions, with 3.7 times less than plane, 5.5 less than private car 13% less than train.

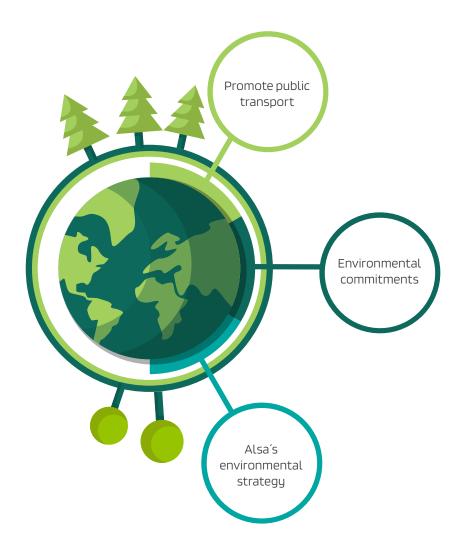

### Lakes Plan: Promoting public transport

- The Lakes Plan is the best case to promote public transport to replace private transport, targeted to preserve high-value ecological areas as the Lakes of Enol, in the National Park of Picos de Europa. This plan applies restrictions in private circulation in peak seasons, encouraging public transport.
- In 2021, operated services for 160 days, achieving a reduction by more than 700 t CO<sup>2\*</sup>.
- Since the plan was launched in 2014, 4.399 tons of CO<sup>2\*</sup> were saved.

\*In-house calculation based on operating data and average consumption of private cars. Emission factors: MITERD V17 April 2021.

Alsa understands that, as a mobility operator, it is both part of the problem and the solution, and that the company should encourage the use of Public Transport and also commit to environmental actions to ensure we become emission neutral, and launching an environmental strategy to reduce them:

# Alsa's Environmental Commitment

Sustainability is one of the main Alsa strategic lines, helping to meet the ODS scheduled in the Agenda 2030, and particularly:

### Health and Wellbeing

### 3.9. Reduction of deaths due to chemical pollution and pollution.

Alsa is committed to reduce emissions produced by transport, adding to the fleet vehicles with low-emission, clean technology vehicles, efficient driving programmes, targeted to reduce consumption and promote energy efficiency.

### Cities and sustainable growth

### 11.6. Reducing the negative environmental impact on cities

Alsa is committed to improve the environmental quality of the cities where the company operates, not only by offering quality public transport to reduce the use of private vehicles but also by investing in clean technologies and an environmentally sustainable fleet.

Over 2021, Alsa has taken significant steps to take further commitments to become carbon neutral by 2050.

Zero emissions in 2035: all urban buses operated by Alsa in Spain will be Zero Emission by 2035.

#### Zero Emission fleet by 2040:

This zero-emission vehicle fleet is a commitment taken for 2040, particularly referring to long haul coaches in Spain and Urban coaches in Morocco.

# Alsa Environmental Strategy

In order to develop its strategy and mitigate and reduce the environmental impact, the activities causing these emissions shall be monitored and controlled, with direct action taken in all the environmental impacts arising, using a Global Management System based on Environmental Efficiency.

Complying with these requirements gives the company the tools it

needs to protect the environment and to constantly enhance its environmental management.

This system is fully implemented in Spain and is the basis for the management in Morocco and Switzerland.

ISO Standard 14001:2015

Specification Aenor 0050 for Efficient Driving

ISO Standard 50001:2011

9 certificates Based on Regulation requirements 1221/2099-EMAS III

Verification Carbon Footprint ISO 14064-1:2012

Alsa develops its environmental strategy around six areas:

Reduction of carbon footprint

Reduction in energy consumption in transport

Reduction of energy consumption at facilities

Waste management

Water management

Training and communications

Due to Alsa activity, emissions produced are a critical indicator in the policy to mitigate its impact in the environment

#### **Greenhouse emissions**

Increase of absolute values of emissions is due to three factors:

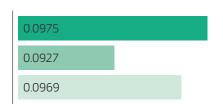

- Increased activity levels over the COVID-19 pandemic.
- Increase of the urban transport significance in the company.

Urban transport vehicles have higher consumption, are driving in cities with traffic congestion, make stops, etc.

 Compliance with ISO calculation standard 14064:2018. The new standard requires a calculation of all significant indirect emissions in order to increase the monitoring. Alsa has been reducing its emissions in a sustained way over the last few years

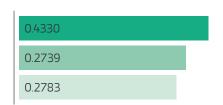

### Direct indirect GEI (scope 1 and scope 2) (tCO<sup>2</sup>eq/100 km)

Greenhouse emissions (scope 1, scope 2 and scope 3) (tCO<sup>2</sup>eq/100 km)

Intensity of direct emissions (tCO²eq/thousand €)

2021

2019

Alcance 1: Direct emissions caused by activity, use of fossil fuels and air-conditioning coolant gases.

 $Alcance\ 2: Indirect\ emissions\ generated\ by\ purchased\ electricity\ that\ is\ consumed\ by\ the\ company.$ 

 $Alcance \ 3: Indirect emissions generated through the company's activity but which are owned and controlled by third parties outside the organisation.\\$ 

These data are for Spain, the rest of countries are included in the annex.

Own emission factor subject to the operational performance of the company and the emission factors MITERD V17 April 2021

Scope increased driven by the new calculation method of the ISO 14064. This is the reason for the increase

of emissions in 2021 compared to

### ISO 14064. previous year.

### Other atmospheric emissions

Alsa also seeks to reduce the rest of atmospheric emissions with harmful effects on health, like nitrogen oxide and nitrogen dioxide, methane, suspended particulates, etc. particularly in urban environments, and targeting to renew all the fleet, and promote the use of alternative energies for vehicles.

### **Compensation of Carbon Footprint**

Alsa calculates and verifies its Carbon Footprint on an annual basis as per ISO 14064 including Scope 1+2+3 and registers it in the carbon footprint section of the Ministry for the Ecological Transition's (MITERD) Carbon Footprint, Offsets and CO<sup>2</sup> Absorption Project Registry.

In 2021, the Carbon Footprint was registered and the "Reduzco" ("I Reduce") seal was received from the Ministry. This validated a reduction in emissions by more than 6.12%, from 2018-2020 compared to 2017-2019 period, for scopes 1+2.

Alsa develops this action based on:

With the new calculation standard, Alsa improves its performance in reducing emissions

This year, Alsa adjusted to the new calculation version of the calculation standard ISO 14064:2018. This new standards pursue improving transparency and a further responsibility of the companies to register their emissions, particularly indirect emissions of the activity. This will help to improve monitoring the usual performance to comply with the zero net emission targets established.

### Companies #ForClimate: Alsa is a clear business example of the fight against climate change

Alsa Forest has been selected as one of the 101 of Business Examples to fight climate change hosted by the Spanish Bureau for Climate Changes and the Biodiversity Company of MITERD.

Companies #ForClimate seeks to implement the Paris Agreement in Spain and the Agenda 2030 for Sustainable Development of the companies.

### Alsa created the ALSA Forest programme to compensate emissions

Alsa, committed to restoring environmental balance and offsetting carbon footprint, launched an initiative in September 2021 offering customers the chance to make a donation for the amount equivalent to the emissions generated by their journey.

#### Alsa Forest - Reforesting Congosto de Valdavia (Palencia) with drones

This initiative seeks to recover the enormous ecological value of the area after the huge fire that engulfed over 100,000 trees back in 2020.

More than 92,240 trees will be replanted across 58.9 hectares, with an estimated 81,989 tonnes of life-cycle CO<sup>2</sup> absorbed.

Indigenous species will be replanted using manual methods and also with the technological support offered by CO<sup>2</sup> Revolution, alternating traditional methods with cutting-edge techniques, such as the use of big data, smart seeds, and drone planting.

Alsa has an initial reserve of 10,000 tonnes, which will mean focusing on an area of eight hectares and on the planting of 11,250 trees, that may be gradually increased as needed.

To at the end of 2021 will, the footprint compensated by passengers was 80,460 kg. CO<sup>2</sup> and equals the CO<sup>2</sup> removed from the atmosphere more than 483 trees in one year, or to plant four trees per day. More than 9,354 made contributions.

#### Alsa seeks for alternative fuels for the ecological transition

Alsa, in the quest to reduce the carbon footprint, is engaged to these pilots as part of the commitment with sustainable mobility and the search of alternatives to traditional fuels, included in the innovation strategy and their commitment to lead green transition towards zero emission fleets.

#### Bio-fuel HVO in Bilbao

Repsol and Alsa have completed over 2021 a pilot trial for 4 months with HVO, a net zero emission biofuel produced from waste.

HVO is an advanced biofuel meeting with all sustainability certifications required by the EU Renewable Energy Directive, and it is considered as a net zero emission fuel. Also, the product meets all technical requirements suitable to be used in the current vehicles of the fleet operated by Alsa, with no additional changes required.

The project brings an approximate reduction by 300 tons of CO<sup>2</sup>, and it is aimed at showcasing that advanced biofuel from organic caste are part of the solution to reach sustainability objectives in road and land transport, helping to diversify the energy range in Spain.

### First Metropolitan service with Biomethane from organic waste

The Metropolitan route of Zaragoza, operated by Alsa, added in 2021 two biomethane units featuring chassis by Scania and bodywork of Castrosua.

The biomethane driving these vehicles comes from organic waste, usually from sewage plants, pig farms or waste management plants. Besides this being a more sustainable mobility mode, it brings economic benefits in the country areas, with a better leverage of waste and leading with example.

The use of biomethane driven buses provides enough range with the same speed and comfort benefits than diesel-driven vehicles, but significantly reducing CO<sup>2</sup> emissions, as organic waste destroy more CO<sup>2</sup> than the one generated.

### Reduction of energy consumption in transport.

Alsa strategy is supported along three main lines of approach:

- Gradual renewal of the fleet: driven by less polluting technologies tailored to each service.
- Vehicles driven by alternative energy ECO or CERO: Increased

consumption efficiency adding non-polluting vehicles.

 planning and optimisation of routes and services.
 Comprehensive predictive maintenance programmes to leverage vehicles.

COMMITMENT for 2035: all urban buses operated by Alsa in Spain will be Zero-Emissions in year 2035

### Vehicles driven by alternative energy ECO or CERO.

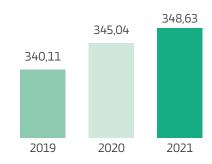

- 131 new vehicles added in 2021.
- 46.3 million € invested 2021.
- 13% of the fleet into services in Spain and 9% in Alsa in total.

#### Fleet renewal.

- 44% of Alsa fleet with the Euro VI technology in 2021.
- 20 new Euro VI vehicles in Spain and 700 in Morocco in 2021.

### Fuel consumption (kWh/100km)

- \* Spain data for diesel oil consumption.
- \*\* Alsa increase of activity since the beginning of the pandemic has gradually increased fuel consumption.

OBJECTIVE for 2040: extended commitment for ZERO-emissions to long haul coaches in Spain and for Urban Buses in Morocco

### Climate project

Alsa has received a Climate Project of the Carbon Fund for a Sustainable Economy (FES-CO<sup>2</sup>) attached to the MITERD.

The project "Alsa, alternative technologies" is based on the reduction of emissions verified by the replacement of traditional vehicles into operation by other vehicles driven by alternative technologies (hybrid and electric).

32 vehicles were replaced in the Urban concessions of Bilbao, Arganda, and Torrejon de Ardoz, with a reduction over the first year of 716 tCO $^2$ . Once completed, a reduction of more than 2,000tCO $^2$  is expected.

### Introduction of new technologies

Alsa has been pioneer in introducing the Hydrogen Bus in Spain.

The project started in February 2021 with the launch event in Madrid attended by the President of the Regional Government of Madrid, Isabel Diaz Ayuso, of the first pilot testing services for the Regional Transport Consortium of Madrid.

This vehicle is driven by a hydrogen fuel-cell electric, CO<sup>2</sup> net-emission, advanced, cutting-edge technology. The hydrogen is a source of energy, and the only emissions produced by bus is water vapour.

This vehicle has been later trialled in other urban operations managed by ALSA as Oviedo, Bilbao, Zaragoza, Coruña and Santander. In Bilbao, the vehicle was launched in the SUM of Bilbao 21 SUSTAINABLE URBAN MOBILITY CONGRESS, attended by His Majesty the King Felipe VI.

In this Congress, Alsa disseminated their expertise in hydrogendriven vehicles, explaining the company's route map to lead transition into net-emission vehicle fleets in our country, and presenting the first trials made with hydrogen units in real operations.

### First hydrogen urban vehicle in permanent service

Since January 2022, the first renewable hydrogen-driven urban vehicle providing service in Spain in an urban route at a regular basis is already under way. Particularly, it operates in the Route 4 in the city of Torrejón de Ardoz as part of the public transport network of the Autonomous Region of Madrid

This new service is included in Alsa's environmental strategy. The company has committed to a zero-emission coach and intercity fleet by 2035 and 2040, respectively.

### Reduction of energy consumption in facilities

We are working to reduce energy consumption in our facilities, mainly electric, with the energy efficiency programme based on energy audits, management of consumption and improvements to lighting and climate control at facilities.

#### **Consumption Electricity** Other power sources (kWh/nº of facilities) (kWh/nº of facilities) 84.835 2.478 1.155 1.166 69.037 68.613 20.878 20.686 2019 2020 2019 2021 2021 2020 **100%** of **↓31**% electric **↓22,8% ↓ 28,8%** consumed consumption reduction Reduction of total energy electricity from 2015. of heating comes from consumptions consumption renewable since 2015. in the energy. facilities since 2015.

Identified as one of the key elements in the sustainable Development Objectives, education is the best driver to raise awareness on the need to live in sustainable, health environments.

For this purpose, Alsa has implemented several initiatives in order to train and raise awareness, targeted to all employees, in the crucial impact of their good

behaviour and performance in the environment, and the reduction of environmental impact.

Alsa's strong commitment is mirrored in Internal Communications processes, in an Environmental Suggestion Box, briefings and training, etc. Collaboration and good performance of the employees are key for Alsa to reduce their environmental impact and improve their environment where they perform their activity

### **Efficient Driving Programme**

Alsa has in place a training programme targeted to reduce emissions:

Training in Efficient Driving is key in Alsa strategy. An efficient driving style delivers lower fuel consumption and wear of vehicles, leading to reduced pollution and a safer, more comfortable driving.

A voluntary training module was launched by Alsa due to the pandemic in CHRIA, available for all the employees in the company.

The Efficient Driving programme is carried out in 3 phases:

\*Alsa Spain figures.

#### Report **Engage** Telemetry system Communications to all staff to know (FleetBoard) the programme, featured in the fleet their results and to vehicles, helping to implement efficient monitor the driving driving in their dayto-day activities. +800 vehicles fitted with 2,200 drivers in the monitoring system. programme.

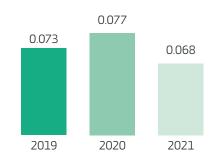

Responsible water management is also one of the objectives of Alsa's environmental policy.

11.2% of total of water

The highest water consumption comes from the washing of vehicles activity.

Recovery of activity in transport services and other operational activities had a positive impact in the water indicator consumption.

### Water consumption (m³/100km)

There are three waste water produced, depending on their origin:

water produced in the points of sale urban use.

Offices, stations and points of sale.

Industrial waters produced by automotive.

Depots and parkings, suppliers and washing.

Industrial waters from hospitality sector.

Service Areas.

### Total Wastewater Discharge (m³/100km)

Waste generated by Alsa come from the waste of conducting maintenance and repair

services on fleet vehicles, and in own maintenance sites. This generation of waste, dangerous and not dangerous, is an indirect environmental aspect of transport.

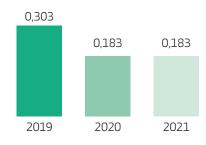

Alsa ensures maintenance and repairs in in-house depots to ensure the control on the environmental impact of the waste produced via the management and certification systems.

### Waste management in vehicle maintenance

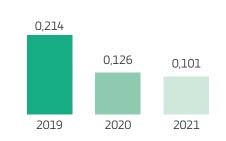

Each working site has a comprehensive management of the production and waste:

- Programmes to reduce waste.
- Date where new technology.
- Use of long-lasting materials and high performance.
- Work to raise awareness and training to the maintenance staff.

### Hazardous waste (t/nº vehicles)

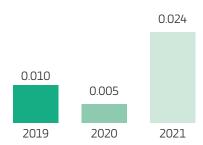

### Non hazardous waste management (t/nº vehicles)

### Waste from management activities

In office-based activities the main waste produces is paper.

recycled 20t of paper, employees awareness

### Circular economy

In 2021, the Guide in Best Practices in Circular Economy promoted by the Federación Asturiana de Empresas (FADE) and the Town Council of Gijon, where ALSA took part from the beginning along with other companies leading in its sector.

This Guideline is aimed at promoting best practices related to the environment that may be replicated in other companies of Gijon and Asturias, improving sustainability.

Alsa's provides expertise and long-term reputation in sustainable management of transport, leveraging resources and fleet management through efficient driving.

# Support to the community

In 2021, the company continued implementing the Corporate Social Responsibility Action Plan addressing the key issues for Alsa and their stakeholders, based on the outcomes and feedback coming from the materiality research.

### **Equality and Diversity**

Alsa is committed to diversity, included in People and Talent corporate policies. In 2018, the company launched the Equality and Work-Life Committee, reporting directly to the CEO, the "Equilibra ("Balance") Plan, launched to promote female talent and engagement in all areas of the company, and inclusion of people with disabilities through the programme "What are you capable of".

From the external point of view, public transport activity developed by Alsa is also committed to ensure equality and diversity for customers in the communities where we operate. All this underpinning social and geographical cohesion, connecting the areas operated by the company, and ensuring accessible, quality services for all type of customers from all social backgrounds.

### **Employability**

Alsa implements and develops programmes and policies to promote and encourage employability, some in-house, further detailed in the People section:

- Integrate young talent: Muevete and Graduate Programmes.
- Training programme and integration programme for people with disabilities: What are you capable of? Programme.
- English scholarships for employees' children.

And external scholarships:

- Collaboration and agreements with universities.
- Cooperation with Integra The Foundation.

This is not news for Alsa. The company has invested great efforts and work since 1987 in the Training and Labour Integration of unemployed people, mainly related to bus driving positions. This also included associated activities like mechanics and vehicle maintenance and repair, logistics or hospitality businesses. All this supported by the collaboration with Employment Public Services, both at the national and regional level, Chambers of Commerce and associations to help people at risk of social exclusion, that together with the Training Department promote employability and a professional career for the future.

Achieved key milestones as recognition of a Bus Driver position as a training category in the Professional Certificate plan, the only official way to become a professional driver from the training perspective.

#### 2021 figures

43 certified drivers

16,340 hours of training 14students

#### **Since 1987**

- 6,628 unemployed drivers trained by Alsa.
- More than 2,608,000 hours.
- 8,379 unemployed people trained in total.
- 3,359,000 hours of training in total.

Furthermore, unemployed people benefit from special discounts in several Alsa transport services, as Capital in Galicia, Madrid-Guadalajara and long-haul services of Madrid-Asturias.

### The elderly

In 2021, one of our priority groups are still the elderly, and we focus our social responsible polices on them. People older than 60 years who are member of the loyalty programme Alsa Plus can benefit from discounts up to 30% in long-haul domestic services. At the local level, we have developed several initiatives including the special promotion to travel in the regional services of Asturias with 25% discount all days of the week.

Besides traditional policies, some of the new actions developed throughout the year, to be highlighted the creation of new products like discount policies in the routes of Madrid-Zaragoza-Barcelona. People over 60 years old may benefit from discounts up to 50% for 6 months at €5, in the case of the Madrid-Zaragoza and Zaragoza-Barcelona and €9 in the case of Madrid-Barcelona.

In 2021 new special actions were developed, as flash sales initiatives for a limited period of time, offering appealing discounts for people older than 60 years.

The main actions developed are related to human capital, with specific programmes providing Support to retired people, as well as senior family members of the employees with the **Programme** "Alsa Helps You", both developed in the section People.

### Integration of people with disabilities

- Collaboration with Plena Inclusión Madrid: partnership agreement signed between the mobility operator and the charity Plena Inclusión Madrid targeted to promote cognitive accessibility as a value for customer service and contributing to include people with intelligence or development impairment.
- Initiative "Travelling with a Companion": launched in 2020, this offers the
  possibility of getting a free ticket for people assisting passengers with
  disabilities. This is aimed at promoting the autonomy skills of this group
  of passengers without incurring in an extra cost for them.

In 2021 we relaunched this campaign and added a 15% discount for the disabled passenger, added to our offer of a ticket free of cost for their travelling companion.

 Agreement with ONCE Foundation to generate jobs for people with disabilities.

- Development of actions included and developed in other sections of this report, as the Accessibility Plan or the Programme What are you capable of?
- fundación
  JUANXIII
  roncalli
  PARA LA DISCAPACIDAD INTELECTUAL
- Cooperation with The Fundación Juan XXIII.

 Cooperation with the Paralympic Committee, to promote sport for people with disabilities. In 2021 a double-decker bus was launched to commemorate the 25th anniversary and to promote the Spanish Paralympic team and their participation in the Olympic Games of Tokyo.

### Voluntary work

### Award by the Foundation Integra to their commitment to Voluntary work.

Alsa is a partner company and sponsor of the Integra Foundation since the year 2001, a non-charity entity committed to labour integration of people at risk of social exclusion. Evidence of their commitment is the addition into the staff of 40 people at social risk exclusion.

In 2021, Integra recognised ALSA's commitment over the Annual Awards Ceremony. Also, continued support is provided to the Foundation with donation campaigns targeted to customers through the website.

In 2021

**Since 2001** 

**Since 2014** 

1job

• 40 jobs

58 volunteers

• 19 volunteers

In 2021, Foundation Integra donations increased by 31%

### Other charity actions

Alsa cooperated in 2021 with several entities to support disadvantaged groups. The most notable were as follows:

- Cooperation with the **University of Oviedo** to send 815 books for university students of Guinea-Educación.
- Cooperation with the NGO Hombre Nuevo Tierra Nueva, for the transport of healthcare material from Asturias.
- Donations to the people affected by the volcano in La Palma. Addressed the call made by the transport concessionaire company in the island of La Palma, TILP Group, Alsa employees and the company itself collaborated with private donations to support the house renting for six months of a neighbour family of the island.

### Childhood in Morocco

To be highlighted the work done to support childhood in Morocco by the company:

- Road safety training school in Marrakech. More than 1,384 students have been trained in the Road Safety Training Centre in Marrakesh to become Ambassadors on Road Safety. More than 4,500 students have been trained since the initiative was launched. They are 11-12 years old students from both public and private schools in Marrakesh.
- Collaboration in the Province of Rhamna, in the suburban area of Marrakesh to support authorities in the management of the school transport services in the area, carrying children from their native villages to their educational centres. The service transports every day more than 10,000 children in 102 minibuses. Alsa runs all the transport management issues, including the scaling of the network, the arrangement of pick-ups, the technical check of the fleet, training provided to drivers at the Alsa's training centre, the driving licence and the reorganization of the operational model, and the management of Service Managers.
- Building a rural school. Alsa has been involved in the building of a rural school on the village of Ait Aisha in the M'Goun valley, at 2,000 metres high and with difficult access, providing transport for over 70 elementary school students. The closest city is 2 hours from the village, and children only have this option to go to school. Also, the school, bathrooms and the house for the teacher were financed with this project. The school opened in October 2021.

### Other options in Morocco

- Blood donation in Morocco. On-going actions related to blood donation, transport cards for groups at risk of social exclusion and with the collaboration of the Women's Association.
- Collaboration with Amal Association (it means Hope in English) to promote training and integration in the labour market of women at risk of exclusion. The association provides training for 36 women in the Restaurant of the association, training them on hospitality jobs and functions, providing access to the job market in hotels and restaurants of the city after completing the training, with an employability rate close to 100% or supporting them with training to establish their own business. Financing offered with micro-credits. Alsa supports this initiative providing transport. To the association and all their members, and for their events, also hiring their services and play an active role as a volunteers of the NGO.

### Alpine ecosystems

Collaboration with the organization CRE- Mont Blanc in Switzerland. Together with the companies located in Switzerland, Alsa plays an active role with the organisation CRE – Mont Blanc, a Research Centre of Alpine Ecosystems (CREA Mont-Blanc) based on Chamonix, with a double mission. First, by conducting a research on the impact of climate change in the biodiversity of the mountains, and on the other hand, by sharing their work with the public, the companies and the managers to take the appropriate actions required.

Many customers are contributing with their bookings donating voluntarily  $\in$  0.50 to this initiative. In 2021,  $\in$  1,124 was raised on their behalf.

At the same time, our commitment with this project and the partnership with CREA Mont-Blanc was posted in the websites of Alpybus and GVA Transfers.

# 2022 Objectives

Go forward with the strategy on Social Action and Action Plan of the CSR

Impact of the activity of the company in the local employment and development (social action, voluntary work, scholarship programmes, training...)

Relations held with the players/stakeholders in the local communities and the dialogue modalities in these (who I'm collaborating with (NGOs, Administrations...) and how.

Partnership or sponsorship associations.

Release of actions to stakeholders.

Actions in the Strategic Field

132 Vehicles using Alternative Technology.

Reduction of emissions of 522 tCO<sup>2</sup>e.

Environmental efficiency measures in the transport

Efficient driving programme.

Reduction by 0.36% of the emissions associated to consumption.

Reduction of emissions of 1,003 tCO<sup>2</sup>e.

Compensation of the carbon footprint in the web sales.

Environmental efficiency measures in the facilities

Energy efficiency programme.

Reduction by 1.3% of the energy consumption in facilities.

Reduction of emissions of 4 tCO<sup>2</sup>e (100% of the electric energy Consumed has GDO´s).

# **APPENDIXES**

### About this Sustainability Report

GENERAL TÉCNICA INDUSTRIAL, S.L.U. (Hereinafter Alsa) submitted its fifth Corporate Social Responsibility drawn up fully subject to compliance option with the GRI Standards.

2021 was the first year that, subject to the Law 11/18 on 28 December in the non-financial and diversity information, the present report is also a non-financial statement of the Group, having been verified by an independent external entity (AENOR).

In this report, Alsa offers an overview of its performance in the period from 01 January 2021 31 December 2021 in terms of its sustainability commitments from an economic, social and environmental perspective.

As well as providing accurate information for Alsa's stakeholders in response to the topics identified as relevant in the materiality study, the results of which are detailed in the chapter on Excellence, the document also offers information about other sections which, thought they are not deemed relevant for the organisation, help to increase transparency and promote a better understanding of Alsa's operations.

The data provided in this report refer to the activity performed by the company in all countries where it operates. The list of companies included in this sustainability report is included in the Annex: Alsa Corporate Structure. In those cases mentioning specific activities of any country, this shall be detailed on a case-by-case basis.

## **GRI Index**

| GRI     | Version    | Brief description  | 2021   | Pages   |
|---------|------------|--|--|---|
| Organis | ation prof | ile  |  |   |
| 102-1   | 2016       | Name of the organization.  | ALSA GRUPO S.L.U. (Referred to herein as ALSA)   |   |
| 102-2   | 2016       | Activities, brands, products, and services.  |  | 5, 8-10   |
| 102-3   | 2016       | Location of headquarters.  | C/Josefa Valcarcel 20 - 28027 Madrid (Spain).  |   |
| 102-4   | 2016       | Location of operations.  | Alsa operates currently in Spain, Morocco, Switzerland, France, Andorra and Portugal. In 2021, in Puerto Rico the company has no activity.   | 5, 8-10   |
| 102-5   | 2016       | Ownership and legal form.  | National Express Group, PLC, which is listed on the London<br>Stock Exchange, is the parent company of the ALSA group.   | 5   |
| 102-6   | 2016       | Markets served (broken down by region, sectors, types of customers and beneficiaries). |  | 5, 8-10   |
| 102-7   | 2016       | Scale of the organization.   |  | 4, 8, 51, 63,<br>127-131                                  |
| 102-8   | 2016       | Information on employees and other workers.  |  | 4, 8, 51, 63,<br>127-131                                  |
| 102-9   | 2016       | Supply chain.  | Alsa separates its suppliers into direct suppliers (which have to do with the cost of activity) and indirect suppliers (related to overhead costs). Direct suppliers include suppliers of fuel and vehicle maintenance, etc., and transport suppliers that provide reinforcement services when Alsa is unable to deliver services with its own resources due to the volume of demand. In the case of urban and suburban services, activities are not outsourced.   | 36-37   |
| 102-10  | 2016       | Significant changes to the organization and its supply chain.                          | In February 2022, a new HRs Director joined the company.   |   |
| 102-11  | 2016       | Precautionary approach or principle.   | GRI indicators 102-29, 102-30, 205-1.  | 11-12, 19-<br>20, 27-28,<br>41-50, 53,<br>83-99           |
| 102-12  | 2016       | External initiatives.  | Alsa also adheres to several environmental initiatives, including "Community for Climate".   | 36-37,66-<br>68,69-71,<br>73,91,93,<br>99-100,<br>102-104 |
| 102-13  | 2016       | Membership of associations.  | Alsa belongs to various industry associations, including the international association IRU and the Spanish associations CONFEBUS, ASTIC and ATUC.  |   |
| Strateg | J          |  |  |   |
| 102-14  | 2016       | Statement from senior decision-<br>makers.   |  | 2-3   |
| 102-15  | 2016       | Key impacts, risks, and opportunities.   | GRI 102-30  The main risk in 2021 was the circumstances related to the pandemic, with a reduction of passengers, contagions among employees, mainly drivers for their exposition.  The main risks identified are non-renewal or loss of profitability of transport concessions and contracts, an increase in diesel prices and an increase in labour costs.  Other risks have also been identified, including falling passenger demand, lower subsidies and compensation for the provision of loss-making services, and political movements. | 8-15  |
|         |            |  | The rest of priority risks and opportunities were covered in the report.   |   |

| GRI      | Version     | Brief description  | 2021  | Pages  |
|----------|-------------|--|---|--|
| Ethics a | nd integrit | :y   |   |  |
| 102-16   | 2016        | Values, principles, standards, and norms of behavior.                          |   | 6, 23, 29-35   |
| 102-17   | 2016        | Mechanisms for advice and concerns about ethics.                               |   | 27-28  |
| Governa  | ance        |  |   |  |
| 102-18   | 2016        | Governance structure   | The Committee making the decisions on economic, environmental and social issues is the Board of Directors.  | 16   |
| 102-19   | 2016        | Delegating authority   |   | 16   |
| 102-20   | 2016        | Executive-level responsibility for economic, environmental, and social topics. | Environmental topics fall under the remit of the Strategy and Organisation Committee.   | 16   |
| 102-21   | 2016        | Consulting stakeholders on economic, environmental, and social topics.         | The Institutional Relations Department reports to the Board of Directors on CSR-related matters. Analysis of material topics is undertaken across all stakeholder groups.   | 22, 24-26  |
| 102-22   | 2016        | Composition of the highest governance body and its committees.                 |   | 16   |
| 102-23   | 2016        | Chair of the highest governance body.  |   | 16   |
| 102-24   | 2016        | Nominating and selecting the highest governance body.                          | The members of the Board of Directors are selected at the discretion of the CEO.  | 16   |
| 102-25   | 2016        | Conflicts of Interest.   | Members of the Board of Directors are subject to ALSA's code of conduct and to compliance regulations, and violation thereof is provided for under the organisation's disciplinary policy.  | 27-28  |
| 102-26   | 2016        | Role of highest governance body in setting purpose, values, and strategy.      | "Our values" of Excellence, Safety, Customers, People and Community are the National Express group values, which ALSA embraces and applies across all its activities.   |  |
| 102-27   | 2016        | Collective knowledge of highest governance body.                               | The Board of Directors meets regularly to receive reporting and undertake monitoring of economic, environmental and social matters, and is trained in these areas where necessary. The Institutional Relations Department reports to the Board of Directors on CSR-related matters. | 16   |
| 102-28   | 2016        | Evaluating the highest governance body's performance.                          | The members of the Board of Directors are subject to the annual target-based Performance Appraisal, which is governed by the criteria of the National Express Group.  |  |
| 102-29   | 2016        | Identifying and managing economic, environmental, and social impacts.          | Potential risks are evaluated at Board of Directors meetings and the monitoring processes are outlined in the minutes. The Chief Safety Officer registers the main corporate risks and their status on an annual basis, reporting to the National Express Group.                    | 4, 17-18, 29-<br>35, 42-49,<br>51-52, 63-<br>64, 83-98 |
| 102-30   | 2016        | Effectiveness of risk management processes.                                    | Potential risks are evaluated at Board of Directors meetings and the monitoring processes are outlined in the minutes. The Chief Safety Officer registers the main corporate risks and their status on an annual basis, reporting to the National Express Group.                    | 4, 17-18, 29-<br>35, 42-49,<br>51-52, 63-<br>64, 83-98 |
| 102-31   | 2016        | Review of economic,<br>environmental, and social<br>topics.                    | The Board of Directors meets on a monthly basis and evaluates all economic, environmental and social topics.  |  |
